

EcoElectronix Introduces a Sleek and Stylish Stapler that Doubles as Office Decor

March 07, 2019

March 07, 2019 - PRESSADVANTAGE -

It can be difficult finding useful office products that look stylish and don't stick out or take up too much room on a desk. EcoElectronix understands the need for office products that blend into the workplace and look elegant and sleek in modern surroundings. The eco-conscious company specializes in providing high-quality electric staplers and pencil sharpeners for everyday and workplace utility.

One of their top selling products is the EX-25 electric stapler that is small and compact and comes in both black and white. The small family-owned company has over 900 reviews on Amazon.com from customers who are loving the staplers performance and style.

Recently an EcoElectronix customer wrote, "I love this stapler. It has a nice, small form factor very similar in size to a conventional stapler. Plenty of power to staple through multiple pages. And it looks great on my desk. I've had many other power staplers over the years but so far this is shaping up to be the best, and did I mention they offer a lifetime guarantee. You can't beat that. Gives me confidence in the product. Buy it, you won't regret it."

Many of EcoElectronix customers pride the company in the outstanding lifetime warranty service they offer on both their EX-25 electric stapler and EX-20 electric pencil sharpener. If the product is defective, damaged, or stops working, the company will replace it hassle free with expedited shipping.

In regards to the lifetime warranty, another customer wrote "These are working great (purchased 2). I ordered them for work and we use them quite frequently. The last one I had was much more expensive and only lasted about 9 months. The really great part is that these come with a Lifetime warranty, which is why I chose these. The seller even contacted me to make sure I was satisfied. I would gladly recommend this product!?"

To help the stapler blend in even more, and not stick out like some manual and electric ones do, the EX-25 comes with two power options. Customers have the option of using batteries that make the stapler more discreet, or the included AC power adapter.

Although the stapler is advertised as small, it is still very powerful, and can successfully staple up to 25 sheets of paper without jamming. Some jobs require precision stapling, luckily the EX-25 is adjustable, and users can choose how much room to leave between the staple to the edge of the paper.

For \$39.73 readers can purchase the electric stapler, and receive free two-day shipping available to all Amazon Prime members. More information on EcoElectronix and the products they offered can be found on their website or Amazon.
