

Commercial Cleaning Sydney Gives Additional One Week Paid Holiday To Staff In 2019

March 05, 2019

March 05, 2019 - PRESSADVANTAGE -

Commercial Cleaning Sydney Co has announced that they are rewarding their staff by giving them an additional one week paid holiday in 2019. This comes in the heels of a previous announcement by the company that they have expanded their team of cleaners. The company offers a comprehensive range of services for various corporate clients, ranging from small businesses to huge corporations, with several locations to be managed with only a small time allotted to do it.

Felix, operations manager at Commercial Cleaning Sydney Co, says, "Cleaners are usually underappreciated for the hard work they do. They usually work under the radar after hours when no one else in the office is around which means the good work they do often goes unnoticed. This is the reason we feel that as a cleaning company and as an employer, it is our responsibility to ensure they are recognised for their hard work."

Felix adds, "We have grown rapidly in the past year and the feedback from customers we have received have been spectacular, and this is mainly due to the hard work the team has put in so it's only fair that we reward them for all their efforts."

Indeed, Commercial Cleaning Sydney Co is serious about its commitment to its clients, offering a 100 percent satisfaction guarantee. And the only way they can be sure of that is to keep their staff happy, as evidenced by their recent decision to provide their staff with an additional one week paid holiday for the current year.

Furthermore, they ensure that their staff are professional and fully trained. They make sure they have the right people to always do the job at such a high standard. The staff are not just fully trained but they also go to the client fully equipped to ensure that the cleaning processes can be performed properly and adequately.

The services provided by Commercial Cleaning Sydney Co can be subdivided into several categories. These are: construction cleaning, childcare cleaning, medical centre cleaning, gym cleaning, office cleaning, and commercial kitchen cleaning.

Construction cleaning is for clients who have discovered that the builders have left behind a gigantic mess just before they are scheduled to move in or hand over a building to their client. This is a special kind of service and quite different from general house cleaning because cleaners need to have specialised knowledge regarding chemicals and materials to tidy up the mess effectively and safely.

The childcare cleaning service is for childcare centres in Sydney. This requires the use of non-toxic and environmentally safe products for cleaning these facilities. Since children are constantly exploring, gentle cleaning products need to be used for childcare centres to ensure their safety.

Medical centre cleaning services are for medical clinics in the Sydney region, ranging from dental practices, general practitioner clinics, and physiotherapy clinics. Here, their focus is to ensure that all surfaces are properly sanitised after the cleaning process is completed.

In commercial kitchen cleaning, obviously a strict cleaning process must be followed. Cleaners from Commercial Cleaning Sydney Co have been properly trained on how to clean establishments in the hospitality and restaurant industry. Furthermore, the cleaners must ensure that there is minimal disruption to the venue while they do their cleaning. The cleaners ensure that fire hazards are minimised, rodents and other pests are eliminated by getting rid of their food source, equipment can run more efficiently, and the business complies with NSW OH&S requirements.

Commercial Cleaning Sydney Co has more than 10 years of experience as a cleaning service company. They have focused on enhancing staff training and retention by providing career advancement opportunities, the use of modern cleaning technology, regularly reviewing their processes, and working closely with their suppliers. As a result, they expect to prevent common problems like inconsistent cleaning quality, high staff turnover, and missed cleans.

Those interested in developments regarding the company can check their media room. Those who want more information or want to ask for an estimate can check their website or contact them by phone or by email.
