The Key Guys Helps Minneapolis Residents Replace Lost Car Keys

March 05, 2019

MINNEAPOLIS, MN - March 05, 2019 -
With over two feet of snow covering the ground, it?s no surprise that a number of people have lost their car keys in the snow. The Key Guys owner, Brian Nystrom points out that, ?It happens every year, but this year has been crazy. People lose keys ice fishing, skiing, sledding, hiking in the woods, you name it.? The Key Guys offer on-the-spot key duplication services in the Twin City Metro area. ?We can come to you and save you the hassle and cost of a tow, not to mention being less expensive than the dealer,? says The Key Guys.

The VIN, or Vehicle Identification Number, is a numeral code composed of 17 characters that serves as a sort of fingerprint for the car. These unique identifying codes were first used in 1954 and have since been used to identify particular vehicles. It is impossible for two vehicles to have the same VIN number, which allows the company to have a key made, with only the VIN number, using a specialised key cutting machine. Certified automotive locksmiths like The Key Guys are able to replace car keys using only the vehicle?s VIN number. This means that a car key can be made without access to the original, and The Key Guys is able to do this for less than the amount charged by car dealers?while also being able to drive to clients anywhere in the Twin City Metro area and offer assistance immediately.

The company is capable of making replacement keys for cars built as long ago as the 1950s, having displayed this capability at the annual Back to the 50?s event. ?The Key Guys can make replacement and duplicate keys for these old timers, as well as virtually any current model year vehicle,? asserts The Key Guys. ?During these events, we make a lot of spare keys for people who recognize the value of being prepared for the possibility of a lost or broken key.?

The Key Guys has over 50 years of combined experience in the automotive locksmith industry. With friendly and knowledgeable staff on hand at all times, the company works to help their clients determine what the best option is in any particular situation, and ensure that they are provided with the tools, knowledge, and support needed to solve whatever issue they need help with. The Key Guys Prides itself on providing unparalleled customer service that goes beyond the basic requirements of their locksmith service.

The Key Guys has received over 250 reviews of their service on Google. Clients who have worked with them hold the company in high regard, with the average score being 4.9 out of 5 stars. The company is committed to providing quick, efficient service to all its clients, and the positive Google reviews they have received are evidence of their success. ?We make sure our locksmiths are well-trained and show up onsite with a fully stocked vehicle,? says Nystrom. ?Our team also prides itself on arriving promptly to get a job done and treating our clients to great customer service. These positive reviews show our efforts are having very positive results.?

With winter here and with all the trouble it brings, from power loss in key fobs due to extreme temperatures to simply losing a key in the snow, The Key Guys are ready and prepared to rush to the aid of stranded clients and provide them with brand new keys without the need for towing or waiting long periods of time for a replacement. This is all in addition to providing lower costs than car dealers in the area. With a fleet of vehicles ready to be dispatched at a moment?s notice, armed with all the necessary tools, the company assures customers that they will not have to wait hours in the winter cold for someone to help replace car keys that are lost.

Those who wish to replace their lost car keys without the high cost in terms of money and time may wish to call upon the services of The Key Guys. They are a reliable service with years of experience, and a multitude of positive reviews that attest to the advantages of their service.
