

Austin, TX Metal Roofing Contractor Hires Standing Seam Metal Expert

March 08, 2019

March 08, 2019 - PRESSADVANTAGE -

Quality Steel Solutions, a leading provider of metal roof installation services, is thrilled to announce the addition of Jack Setson as a welcome addition to their group of roof assembly professionals.

Hiring Jack Setson will allow Quality Steel Solutions to deliver their metal roofing services in more locations near Austin, TX and enable the company to provide its customers a wider assortment of standing seam metal services. Jack's specialty is superior quality standing seam metal roofing, with advanced expertise in the use of specialty metals, such as copper and tin.

"We are proud to welcome Jack Setson to the Quality Steel Solutions family," said the General Manager of Quality Steel Solutions. "Jack is focused on providing excellent standing seam metal installation services to our clients in the Austin area and expanding our capability to provide specialty metal roofing services with the most modern methods and solutions."

The organization stated that they asked Setson's to join the group due to his expert experience installing standing seam metal roofs, which will allow Quality Steel Solutions to provide a broader array of roofing services in Austin.

Jack stated, "I'm delighted to become a part of the Quality Steel Solution's team. Their training has been great and the methods we'll be using are the most advanced out there. I'm truly excited to get going, and broaden their metal roofing services within Travis County."
