

Calgary Counter Pro Introduces a New Range Of Quartz Countertops

March 11, 2019

March 11, 2019 - PRESSADVANTAGE -

Calgary Counter Pro, a leading specialist in residential and commercial construction for over a decade, today announced that it will be introducing a new range kitchen countertops.

The new range, which sees the arrival of countertops for both domestic and commercial use, is available in a variety of materials, including quartz, granite and marble, and colors, including black, cream, white and pink, among others.

The company has revealed the highlight of the new range is the arrival of quartz, one of the hardest minerals found in the Earth. A spokesperson for the company said: "Quartz countertops are ideal for homeowners looking to turn their kitchens into unique and stand-out spaces. A long-term product, Calgary Counter Pro Design's quartz countertops are available in a variety of sizes, allowing for a seamless one-piece installation with no cuts and joints. Customers can create a uniform, clean surface that takes pride of place in the kitchen for years to come."

The spokesperson also noted that the company is thrilled with the new range of worktops they can now offer

at Calgary Counter Pro. Their aim is to provide their customers, residential or commercial, with a variety of solutions so they can turn their interior dreams into a reality.

Quartz countertops are non-porous, meaning the texture does not allow bacteria to grow. Resistant to stains, the new countertops from Polaris will protect families from germs. Aside from the durability of quartz, the natural beauty of the mineral will also add character and aesthetic appeal to any commercial or residential kitchen.

The final appearance of the new quartz countertops is rich and luxurious. The durability of the mineral means the countertops from Calgary Counter Pro will not chip or crack easily. There are very few drawbacks to quartz worktops, and they are a contemporary alternative to granite and marble.

The company spokesperson added: "We are thrilled with the new range of worktops we can now offer at Calgary Counter Pro. Our aim is to provide our customers, residential or commercial, with a variety of solutions so they can turn their interior dreams into a reality. Although the whole range offers beautiful, contemporary options, the quartz kitchen countertops truly stand out."
