

Dr. Amauri Wellness Centre In Toronto Announces New Naturopathic IV Therapy Cocktails

March 29, 2019

March 29, 2019 -

Dr. Amauri Wellness Centre in Toronto, Ontario has announced that they have added four new naturopathic IV therapies. The new IV Therapy drip cocktails include Customized IV therapy Drips, Hair, Skin and Nails therapy, Pre and Post Exercise Support and a Vitamin D shot.

?Naturopathic IV therapy provides a wide range of benefits,? says Dr. Amauri Caversan. ?IV therapy allows for the beneficial substance to be delivered directly into the bloodstream, which in turn allows it to work faster and much more effectively.?

Dr. Amauri states that their new Customized IV therapy Drips are a custom made IV treatment that may be composed of a number of amino acids, antioxidants, vitamins and minerals, custom tailored to each client and his or her specific health concerns or goals. Dr. Amauri states that this is a highly beneficial therapy for those who are looking to raise their energy levels or overcome a number of other health concerns.

IV therapy has gained in popularity over the years as more and more clinics and wellness centers have begun to offer it to their clients. IV therapy with Vitamin C is often used to help combat the side effects of various cancer treatments, and many choose IV therapy simply to rehydrate after exercising or minor health issues.

?It is a way to deliver these benefits quickly,? says Dr. Amauri. ?We are pleased to be able to offer many more choices to our clients with regards to the types of IV therapies that they can choose. All of these offer their own unique benefits.?

Dr. Amauri has been providing IV therapy in Toronto to clients for a number of years. The wellness center has become very popular among those looking to improve their general wellness. Dr. Amauri states that the wellness center?s new hair skin and nail support IV therapy is designed to provide benefits to skin elasticity and hydration. Pre and post exercise support helps to restore glycogen and the body?s natural stores of amino acids to support recovery and strength in those who exercise. Dr. Amauri states that this therapy is particularly designed to help those who may push their limits when they are working out or who may be training for an upcoming sporting event.

The Dr. Amauri Wellness Centre also now provides Vitamin D Injections in addition to various other intravenous therapy options for a wide range of client needs. Dr. Amauri states that anyone who would like to learn more about the wellness center?s current intravenous therapy offerings or their benefits can visit them online. The wellness center offers a number of more resources on its website, including information about these therapies and the number of health concerns that they can benefit.

Dr. Amauri?s website also includes contact information for those who want to call or email the wellness center to schedule an appointment, as well as detailed information about each of the treatments that they offer. Dr. Amauri says that IV therapy may offer a number of benefits over the more traditional means of getting certain vitamins and minerals as it acts much more quickly and is delivered straight to the bloodstream, where it can provide the most benefit. Those who are interested in learning more about these therapy types will find detailed information on the wellness center?s website.
