Any woman, single or in a relationship, who is frustrated with men, wants to understand them better, wants to be happier in their relationships and have more success in their love life will benefit from That's Not How Men Work. This has caught the attention of RelationshipFiles.com's Stan Stevenson, prompting an investigative review.

“Our That's Not How Men Work review shows that you get inside information into how men really work from a woman who has worked closely with men in the dating scene for years. This is information that men will not tell you, but you need to know in order to get their attention, keep them interested, and even make them fall in love,” reports Stevenson. “Not only will you learn how to get men, but you will also learn why men do what they do. For instance, you will learn why men seem so interested in you and then suddenly back away. The program answers common mysteries, and you will finally understand what is going on in a man's mind and be able to use that information to your advantage.”

That's Not How Men Work includes 4 aspects to help women meet men, date them and make men want them. There is a 181-page guide called “That's Not How Men Work”, “Unlock His Secrets” for guys who

don't want to open up, 'Confessions From A Wing Girl' that is an audio interview where one can listen to Marni talk about the top male attraction secrets and 'Intoxicate Him With Desire' that will give women a new perception on how to get men to desire them.

'The program will work on any man as it helps you turn yourself into a woman that a man would want. It will help you have a better relationship with men, whether you are in one now or not. Learn what is really attractive to men and how to let them know what you really want from them,' says Stevenson. 'Everything is delivered to a private member's area where you can either download the information or access online. Learn what men want from a woman who has worked closely with men for over a decade and understand them like never before.'

'Chances are you don't know someone who has as many secrets about men as Marni does. If you want to learn the secrets, and use them in your life, then That's Not How Men Work is how you can get her secrets. Her main business is helping guys get women, and until she expands, you are not going to be able to get this information easily. You will leave this information understanding men like never before. That insight will help you have more success with men, both as a single woman and as a woman who is in a relationship. The program gives you the insight you need to make your dating and love life much more successful, happy, and fulfilling.'
