

## **Superior Healthcare In Metairie, LA Now Offers Free Health Consultations**

*July 08, 2015*

July 08, 2015 - PRESSADVANTAGE -

Dr. Benjamin Mcneil, a chiropractor in Metairie, LA announced that his clinic, Superior Healthcare, LLC, will now be providing free health consultations to new patients.

The clinic provides a multispecialty healthcare team including two chiropractors, a medical doctor and a physical rehab specialist. People in the Metairie area who have back, neck, head, and joint pain who are seeking a nonsurgical form of care can schedule an appointment to receive the free consultation.

After the consultation for new patients, Dr. Mcneil or one of the other doctors on staff will explain their findings and their recommended form of treatment in addition to the length of time they anticipate before the patient gets relief.

Superior Healthcare is a certified DME (durable medical equipment) center and its integrated approach, according to Dr. Mcneil, is a fast and effective route to treating health issues.

"It's one location where individuals can have medical services and chiropractic. In the office we have two

chiropractors, a medical doctor, and massage therapy. We coordinate care between our patients and we actually take a team approach."

Dr. Mcneil says the staff uses all the latest technology to diagnose conditions and employ proven methods and techniques to ultimately relieve pain. The free consultation is intended for use by new patients who are suffering from back, neck, head, and joint pain including herniated discs and other disc problems. Potential patients may call the clinic at (504) 835-0565 to schedule the free consultation with Dr. Mcneil and his team and may also see reviews by current patients by viewing the clinic's Facebook and Google+ pages.

"We work with the natural healing abilities of the body and believe that a team of experts can contribute more to the health status of a patient than simply one person or a single philosophy. If, after the consultation, we don't think we can help you get out of pain, we'll be upfront and honest about that. But if we can help you, we'll give you our very best."
