

## **NHS Dentist In Coventry Centre CV1 Offers Family Dental Care To Local Residents**

*April 12, 2019*

COVENTRY, UK - April 12, 2019 - PRESSADVANTAGE -

Those living in Coventry and in need of dental care need not look any further than the Light Lane Dental Practice. Located opposite Barrs Hill School, at <https://goo.gl/maps/EhrXh76bT9R2>, the dental practice has a staple of dental care in the area for over forty years. With a team of friendly dentists focused on meeting the dental care needs of both NHS and private patients, Light Lane's Dentists do everything to make every visit as comfortable and stress free as possible.

Light Lane's patients can rest assured that the clinic makes use of the most advanced technology and techniques to produce results of the highest quality. Those looking for a friendly, professional practice that can treat their whole family, and listen to the needs of both parents and children, will find Light Lane to be an ideal destination for their dental health.

The surgery offers a number of different services to the people of Coventry. Most dental issues can be avoided or treated more quickly when they are detected early, and this holds true for dental issues as well. As regular dental check-ups are an important part of maintaining good oral health and avoiding future disease, Light Lane carries out dental check-ups ongoing every year and those in need of a dental check-up are

encouraged to contact the Light Lane Dental Practice and make an appointment. Find the surgery's site at <https://www.lightlanedental.co.uk/>.

The removal of plaque and tartar is necessary to maintaining healthy, bright teeth and gums. Light Lane offers their professional cleaning services, with a trained hygienist on hand at all times, and those who simply wish to improve the appearance of their mouth can make use of the surgery's many cosmetic treatments. Teeth that have lost a substantial part of their structure and cannot be restored with dental fillings or any other type of remedy are often repaired using dental crowns or bridges. Crowns fit over the affected tooth to shield the remaining tooth structure and return the tooth to its original shape and size. Bridges secure missing teeth by anchoring them to neighbouring healthy teeth, and can help patients who have suffered tooth loss rebuild their smile. Light Lane offers dental crowns and bridges along with traditional amalgam fillings to help patients achieve the smile they desire.

As recently as a few years ago, dental implants were all but unheard of. Now they are an integral part of mainstream dentistry. Heralded as a revolution in the dental industry, an implant behaves and appears like any normal tooth but is actually a titanium post that is surgically implanted into the patient's jaw bone to support a crown, bridge or denture.

Due to their stable and natural looking structure, dental implants are the perfect solution for replacing missing teeth, and for stabilising missing dentures, says Dr Chetan Mathias. A properly placed, strong and secure dental implant will not become loose or fall out and it is designed to last for many years, provided the patient maintains good oral hygiene. Matching the shape and colour of your surrounding teeth, dental implants are an ideal solution for restoring your smile. The surgery has a number of trained implant dentists with years of experience. Those looking for a way to restore their smile are encouraged to contact Light Lane Dental for a free, obligation-free consultation.

The surgery has met the needs of so many patients over the years and plans to continue doing so for years to come. I have been going to Light Lane for some years now, says one patient. I have had a lot of treatment here and everything is always superb, they have always ensured that I get the best treatment, and referred me successfully to the correct people for my more complex treatment while advising me on this treatment as well. I can't recommend Light Lane enough.

The dental clinic states that they have made it their mission to, provide consistent high quality dental care to all our patients. As one of the longest serving dental practices in Coventry, Light Lane is a reliable option for all oral health needs. Interested parties may get in touch with the practice by contacting Sharon Ashton of the Light Lane Dental Practice today, and receive quality dental care from one of Coventry's most experienced dental surgeries. For more information on dentistry and other online resources concerning dentistry, visit the British Dental Association.
