

Get Bonuses With Furnace & Air Conditioner Maintenance Plan

April 02, 2019

April 02, 2019 - PRESSADVANTAGE -

Yellowknife, NT based Heating, Ventilation, and Air Conditioning (HVAC) companies Bulldog Heating & Cooling and Martino HVAC are teaming up to give homeowners an enticing deal: Sign up for a Martino Service Plan and receive two months of service at no charge, or get a free Ecobee 3 Lite WiFi Thermostat. More information can be found at <https://bulldogheating.com/7vmh>.

Bob Bies from Bulldog Heating & Cooling explains that their partnership with Martino HVAC allows the company to expand both their service area coverage and HVAC-related offers, and enables them to provide better customer service and technical support. He points out that, "Martino HVAC is regarded as one of the leading HVAC companies in Ontario, Canada," and says that their 30+ years of professional experience with home comfort systems makes them an ideal partner for any endeavor.

Martino HVAC's Martino Maintenance Plan gives customers multiple options to pick from. Customers may elect to receive tune-ups for their furnace at \$12 per month, both a furnace and air conditioner at \$22 per month, or take up the company's best value deal and have their furnace, air conditioner, Heat Recovery Ventilation (HRV), and humidifier serviced for \$25 per month. Upon signing up, customers may opt to receive

either of the bonus offers previously mentioned.

The Ecobee 3 is a stylish technology that is quickly gaining popularity among its users. While it usually costs \$299 + \$125 for installation, Martino HVAC is offering it for free (after rebate) to all their eager customers who sign up for the company's 2-year annual furnace and air conditioner maintenance plan. Note that customers must retain their monthly maintenance/protection for at least two years following its inception, or they will be charged at the usual rates for all of the remaining monthly payments from time of cancellation up to the end of the two year period. Those interested may learn more about the partnership that brought this intriguing offer to customers at <https://bulldogheating.com/sgdn>.

The innovative device is designed to preserve a family's comfort in homes with multiple rooms, combining a smarter WiFi-connected thermostat with room sensors. As most thermostats are only capable of reading the temperature in a single area of a home, usually a common place such as a dining room or hallway, they can be inefficient at distributing the temperature evenly across the house. This can lead to uncomfortable temperatures in other rooms. However, the Ecobee 3's ability to utilise multiple sensors gives it the ability to truly deliver a homely atmosphere across a house by delivering the preferred temperature to the rooms that most people work or relax in.

Ecobee 3's users have a lot of positive things to say about the device. One user gave it a 5-Star rating on Amazon, saying, "I love my Ecobee3! We are renters, so this was a big undertaking for us to replace the thermostat that came with our apartment with a digital thermostat. Our air conditioning bills were getting crazy, our thermostat was very unreliable (it would randomly go up to 85 degrees in the middle of the night or other times for no reason), and we wanted to be able to control it from outside the home." They went on to explain that they considered other options but finally settled on Ecobee 3 because it was compatible with HomeKit, and would be able to function alongside their existing Apple devices.

"I'm a new homeowner and not yet secure in my DIY skills, so I asked my brother-in-law to help me install it, but in truth I could have done it myself!" said another user who also gave the device a 5-Star rating. "I specifically purchased Ecobee to work with our Amazon Echo so my husband who has MD can control the temperature, and it is perfect!"

In line with their dedication to their customers, Bulldog Heating & Cooling regularly updates their blog, at <https://bulldogheatingcooling.blogspot.ca/>, keeping their followers up to date on tips and best practices to help keep their homes' HVAC appliances up and running at peak condition. Customers who would like to look into how the Ecobee 3 Lite WiFi Thermostat can serve their home environment may contact Bob Bies of Bulldog Heating & Cooling, or connect with the company through their social media platforms to learn more.
