

## **Air Conditioning Edmonton Partner Capital Plumbing & Heating Hits 1,550 Reviews**

*April 02, 2019*

April 02, 2019 - PRESSADVANTAGE -

Air Conditioning Edmonton has announced that partner Capital Plumbing & Heating has hit 1,550 reviews. Capital Plumbing provides quality plumbing, heating and cooling services throughout Edmonton and neighbouring areas. Capital Plumbing is a partner of Air Conditioning Edmonton and as such services clients of the latter. Air Conditioning Edmonton is a provider of 24-hour emergency repair services for plumbing, heating and cooling needs in Edmonton and surrounding areas. More information about Air Conditioning Edmonton can be found at <https://air-conditioning-edmonton.business.site/>.

Dwight Gropper, spokesperson for Air Conditioning Edmonton, says, "We are so excited to have learned that our partner Capital Plumbing & Heating has received more than 1,500 reviews. This is a testament to the quality of the services that they provide. As such, it also reflects our focus on quality because we carefully choose companies that we partner with."

With the hot months in Edmonton approaching, a non-working air-conditioner is not acceptable. This is why Air Conditioning Edmonton provides 24-hour emergency air conditioning repair services. Whatever the problem encountered, the team of experts from the company are always ready to go to the client's home or

property to check on the air conditioning system. Dwight Gropper points out that they can be trusted to provide the best quality and the fastest emergency air conditioning service in the capital city of Alberta. Those interested in the areas served by the company can take a look at <https://air-conditioning-edmonton.ca/fw0u>.

The company also offers air conditioning installation services. They would like to point out that most homeowners would only start to look for a new air conditioner after their current air conditioner has already stopped working. This could cause a lot of discomfort in the residents of the home or building due the uncomfortable heat. They suggest that people contact an expert once their cooling system has started to show signs of trouble. Because the problems are addressed earlier, it may even be possible to save the old cooling system. But most importantly, the residents of the home are prevented from having to suffer the discomfort from the heat.

Air Conditioning Edmonton also offers air conditioning maintenance services. This ensures that the air conditioning system will be ready and functioning properly once the summer months arrive. A properly maintained cooling system will be able to provide maximum cooling to the home or property without the risk of harmful emissions and wasted energy. With a regular maintenance check up of the system, any potential problem can be caught early and the necessary remedies can be applied to prevent the issue from worsening and resulting in a more expensive repair.

The high quality of the services provided by Air Conditioning Edmonton is attested to by the positive reviews left by satisfied clients. For instance, Ryan J.G. gave the company a five star rating and said, ?I couldn't be more happy with the service that Dwight and his team provided me. I called Air Conditioning Edmonton at 2am in the morning when my heating system stopped working. It happened to be a very cold night so I was very concerned that our pipes would freeze if we didn't get the heat on fast. Within the hour Dwight came out and had our heating system working again. Thank you Dwight!?

Amili G. also gave the company five stars and said, ?We recently purchased a HVAC system from Air Conditioning Edmonton. Not only did Dwight and Tim come out the same day, their service was superb! Answered all of our questions and made us feel comfortable. The installation went unbelievably well and it kept us cool all summer. Thanks again guys.?

Air Conditioning Edmonton is a well respected plumbing and HVAC company serving the residents of Edmonton and nearby areas. They have been in this business for 14 years and their goal is to offer the best air conditioning and heating services in the area. They have also been expanding their service area and recently, they have issued a press release, which can be read at <https://air-conditioning-edmonton.ca/g2xk>, to announce their expansion into Spruce Grove, Alberta.

Those in need of HVAC repair services can visit their website or contact them by phone or by email.
