

Infinit Lash Products Announces Where To Buy Eyelash Extension Glue

April 09, 2019

April 09, 2019 - PRESSADVANTAGE -

Infinit Lash Products, based in Del Mar, California, has announced where customers can buy eyelash extension glue. They want people to know that their adhesive for eyelash extensions is now available on the Amazon.com Infinit store and also on their website.

Tasha Land, founder of Infinit Lash Products, says, "We're so happy to announce that our eyelash extension adhesive is now available on the Infinit store on Amazon.com, including on our website. These are quick drying adhesive for lash extensions and come in five variants. These are the Infinit Sensitive Premium Eyelash Extension Adhesive, Infinit Sensitive Plus Premium Eyelash Extension Adhesive, Infinit Classic Premium Eyelash Extension Adhesive, Infinit Volume Premium Eyelash Extension Adhesive, and the Infinit Volume Plus Premium Eyelash Extension Adhesive."

Recently, they have published a blog post that discusses how to choose the best eyelash extension glue for each particular person. This is because there are five factors that can affect a person's best choice. These are climate, speed, sensitivity, retention, and preference. Because of this, the Infinit eyelash extension adhesives are offered in five variants as discussed by professional lash artist Tasha Land.

It should be noted that for those who prefer a quick drying adhesive, the choice should be Volume Plus. However, it is important to remember that drying time can be affected by the climate such that if the humidity is high the glue will dry more quickly but it will take longer to cure in a relatively drier climate. And then, there is the sensitivity of the person using the lash extension. The fumes from the glue can cause irritation in some people. If such is the case, the choice would be either the Sensitive or Sensitive Plus variants. Those whose clients have sensitivity to the fumes but want a drying time to be as short as possible can go with Sensitive Plus as it can dry within 4 to 5 seconds, compared to the Sensitive variant, which can dry in 5 to 7 seconds.

Furthermore, Tasha Land would like to advise that those who are still new to lash extensions should choose the Sensitive or Sensitive Plus variants as these have the longest drying time. The more advanced lash artists can use the Volume and Volume Plus variants because these are the fastest drying, assuming that their client is not sensitive to fumes. Meanwhile, in the middle is the Classic, which is recommended for intermediate and advanced lash artists.

Those who have already tried the Infinit lash extension adhesives have mostly positive things to say about them. For instance, Audrey W. has given the product five stars and said, 'I've been a professional lash artist for over 4 years full time and I love this adhesive. It's easy to work with, fast drying (but not so fast that you cannot make a correction if necessary) and has a great retention. I've been using it on my clients for 9 months now and I've only had one client get a 'reaction', however we are now fairly sure it was due to her seasonal allergies and unrelated to the adhesive because now she has given it another go and is doing fine...?'

Meanwhile, another customer also gave it five stars and said, 'I was hesitant to purchase this glue because some of the reviews said it didn't last but I did anyway because the price is great (most glues are over \$50) and it seemed like the people who left the reviews were using it on themselves or not experienced/using it correctly. I'm so happy I found this! I've bought it three times already and each bottle has been great...?'

Infinit Lash Products makes sure that their lash extension glue does not contain any latex or formaldehyde because these can be harmful to the user. Furthermore, the company assures customers that every item used in their products has been personally sourced and salon tested to ensure that they are of high quality.

Those who want to learn more about these eyelash extension adhesives can check out the company website or their Amazon store, call them on the phone or contact them by email.
