

Austin Retirement Community The Clairmont Sets Benchmark In 24/7 Resident Dining

April 17, 2019

April 17, 2019 - PRESSADVANTAGE -

The Clairmont Retirement Community on Los Indios Trail in Austin, Texas, has set the benchmark in resident dining by providing resident-focused menu items that are available 24/7. The traditional dining options are still available so that residents can join others in fellowship if they prefer to but now they also have the choice to order food at any time of the day or night.

Joanne Green, Executive Director at The Clairmont Retirement Community, shares the impact the dining model has had on residents: "It's really been a pleasure to lead the industry by offering this and other services that are entirely focused on the quality of our residents' lives. Residents have shared that the 24/7 dining program is especially helpful when they don't feel like going out, are feeling under the weather, or simply prefer to eat at non-traditional times. One couple has enjoyed brunch midmorning - rather than breakfast and lunch - for the past twenty years. They were thrilled to find that they could continue their comfortable routine with us."

There are five different floor plans and pricing options to choose from, making it affordable for most retirees who are searching for a modern arrangement during their retirement. It should be noted that conventional

independent living facilities still have a dining model that is similar to school lunches. Thus, The Clairmont Retirement Community is leading the way for the industry in eliminating barriers between residents and their nutritional preferences. Under the new and innovative dining model, residents can choose to dine with their friends during the usual times in restaurant-style dining, ordering from a full menu or making their choice from a daily special. Or they can choose special menu items that are always available at any time of the day or night.

With this innovative dining model, it is easier for retirees to have a relaxed lifestyle that comes with communal living. It should be observed that while moving into a luxurious retirement community provides a broad range of benefits for retirees, it is common for them to worry about not having access to the usual things they had at home. They may have developed throughout the years unusual routines when it comes to meal and snack times that are not based on the standard schedule of dining. With the 24/7 dining now available, retirees can enjoy the usual meals or snacks they had previously enjoyed in their homes.

Residents at the Austin retirement community are able to enjoy a carefree lifestyle in the all-inclusive retirement community and at the same time they can benefit from the various cultural venues that are only minutes away in downtown Austin, including the Formula 1's Circuit of the Americas raceway and the University of Texas sporting events.

Residents of The Clairmont Retirement Community can take advantage of the various amenities, such as 24/7 dining, easy-move program, charming walking paths, extraordinary location, all-inclusive living, convenient transportation, community service providers, smoke-free living, pet friendly community, on-site staff, and resident referral program.

With the many walking paths available in the retirement community, residents can take a daily stroll and enjoy the great outdoors. And if they have to go someplace, such as shopping, a visit to the doctor, cultural outings, and more, on-call transportation and scheduled pickups are available for residents at any time of the day. Complimentary meals will also be provided. Residents who want to take a break from the daily routine can also go on a trip. They can stay for free any any of the Sunshine Communities and meet new friends and enjoy the nearby cultural opportunities.

Sunshine Retirement Living is a family-owned and patient-center company and is the parent firm of The Clairmont Retirement Community. It manages almost two dozen retirement communities across the US and they provide a comprehensive range of services in assisted living, independent living, and memory care communities. They promote confidence, independence and community among the residents and they have established as their mission to enrich the lives of the residents.
