

Leading Cherry Hill LASIK Surgeons Recognized In America's Top Doctors 2019 Award

April 15, 2019

April 15, 2019 - PRESSADVANTAGE -

New Jersey based Kremer Eye Center Cherry Hill is delighted to announce that five of their surgeons have been recognized among America's Top Doctors in the prestigious Castle Connolly Medical annual awards for 2019. "We are delighted that Kremer Eye Center surgeons have been recognized for excellence in ophthalmology for the 4th consecutive year. Dr. Michael A. Aronsky, Dr. Carol J. Hoffman, Dr. Debra Malley, Dr. George R. Pronesti, and Dr. Anthony C. Zacchei have received recognition from their peers, patients, and the exacting standards of the Castle Connolly's physician-led research team," said Amy Stoller of Kremer Eye Center.

LASIK, or Laser-Assisted in Situ Keratomileusis, is one of the most popular FDA approved procedures to correct eyesight, with 600-800 thousand patients in America each year opting to undergo the procedure. The need to find a surgeon with the requisite experience and the most advanced technology, is the reason why Kremer Eye Center partners with local Eye Doctors across the Greater Philadelphia area, South Jersey, and Wilmington, DE as affiliates to ensure that everyone can find the best eye care services and receive expert advice along with the right vision correction procedure. This ensures that a patient's eyes stay clear and healthy for the years to come after they make the most informed and educated decision possible for their

procedure at the Kremer Eye Center.

Their renowned team includes some of the best surgeons and specialists in the US who have built a foundation on their absolute commitment to their patients. As a leader in vision correction, Kremer surgeons were the first to perform LASIK in North America in 1993. They are committed to using the most advanced technologies for all procedures and treatments to achieve the best vision possible for each patient.

Dr. Michael A. Aronsky is a board-certified ophthalmologist specializing in advanced vision correction solutions, and corneal and cataract treatments to help restore eyesight. He has performed tens of thousands of refractive surgeries. Dedicated to performing the latest and most innovative procedures, Dr. Aronsky was the first in the region to perform Bladeless LASIK, INTACS® Corneal Implants, Conductive Keratoplasty, Sutureless Endothelial Corneal Transplants, and IntraLase Enabled Keratoplasty. As one of the leading Visian ICL surgeons in the country, Dr. Aronsky was also the first to implant a Visian Toric ICL in the tri-state area.

Dr. Carol J. Hoffman serves as a board-certified ophthalmologist and the Kremer Eye Center's Medical Director at the Cherry Hill and Wilmington locations. Throughout her career, Dr. Hoffman has strived to help her patients get the customized eye care and vision correction solutions they need, and has performed thousands of LASIK surgeries.

Dr. Debra Malley is a board-certified ophthalmic surgeon specializing in laser vision correction. She is certified to treat nearsightedness, farsightedness, and astigmatism using the latest and most advanced bladeless LASIK technologies. She also performs facial medical aesthetic procedures. Having spent more than two decades researching and using the excimer laser in refractive surgeries, Dr. Malley has used it to teach residents and medical professionals about the body's healing response after excimer laser surgery.

Dr. George Pronesti is a board-certified ophthalmologist who is focused on providing outstanding care to all patients for LASIK and cataract surgeries. Using innovative techniques, he has helped thousands of patients achieve better vision quality. He also invented the Golf Bifocal and authored a wide array of publications. Before joining the team at Kremer, Dr. Pronesti served as the Vice Chairman of Maryland General Hospital's Department of Ophthalmology where he trained new doctors in the latest, and most advanced, clinical and surgical techniques.

Dr. Anthony C. Zacchei, Director of Glaucoma for Kremer Eye Center and a board-certified ophthalmologist, has performed more than 35,000 successful cataract surgeries over the past 20 years. He also specializes in numerous cutting-edge glaucoma and cataract treatments, including trabeculectomies, shunts, SLT, and ECP. Furthermore, Dr. Zacchei has worked with premium lenses that help correct presbyopia and astigmatism.

“Kremer has been providing high quality ophthalmic care in the Mid-Atlantic for nearly four decades. We will continue to collaborate with our local affiliate optometrists to provide first class mutual patient care, because we know that not every patient is a LASIK candidate. As innovative leaders in vision correction, we offer more vision correction options, including PRK (Photorefractive Keratectomy) which Carson Wentz had with Kremer Eye Center in 2017, the Visian ICL (implantable collamer lens).” said Amy Stoller.

Kremer Cherry Hill LASIK alumni, Dan Arra said, “Kremer makes you feel extremely comfortable throughout the process, which is the main reason I chose this place to get it done through all of the LASIK options out there. The doctors and staff are very knowledgeable.” Arra added, “They never rush you here. They answer all your questions and treat you very well. I would do it again in a heartbeat and would definitely choose Kremer (I went to the Cherry Hill office).”

Those looking for more information, or to Schedule your free LASIK Consultation, please call Kremer Eye Center Cherry Hill at (855) 912-8989 or visit <https://www.kremereyecenter.com/schedule-a-lasik-consultation/>. Further contact information can be found on their website, which also allows visitors to call directly, schedule a consultation, and browse Google Maps directions to all their office locations (Cherry Hill, King of Prussia, Philadelphia, Horsham, Limerick, Springfield, and Wilmington).

About Castle Connolly

The mission of Castle Connolly Medical Ltd. is to help consumers find the best healthcare. Castle Connolly Medical Ltd. publishes its list of Castle Connolly Top Doctors® at www.castleconnolly.com, as well as in a wide variety of printed directories, partner publications and on partner/affiliate websites. All told, more than 47,000 physicians - approximately 5% of the nation's licensed physicians - have been selected as Castle Connolly Top Doctors in their regions for their specialties.

Castle Connolly Top Doctors® are selected by Castle Connolly Medical Ltd. after being nominated by peer physicians in an online nomination process. Nominations are open to all board-certified MDs and DOs and each year tens of thousands of doctors cast many tens of thousands of nominations. Honorees are selected from the nominees by the Castle Connolly physician-led research team based on criteria including their medical education, training, hospital appointments, disciplinary histories and more. Doctors do not and cannot pay to be included in any Castle Connolly Guide or online directory.
