

NHS Dentist In Coventry CV1 Now Accepting New Patients

April 25, 2019

COVENTRY, UK - April 25, 2019 - PRESSADVANTAGE -

Light Lane Dental Practice in Coventry CV1, United Kingdom, has announced that they are currently accepting new NHS patients. The dental office states that they offer dental services for every member of the family and that those who do not have a regular dental clinic or who wish to change their dental care provider can now contact them for new patient registration information.

Sharon Ashton, a representative for the dental office, says, "We are currently accepting new NHS patients, but spaces are limited. We encourage anyone who does not have a regular dentist to contact us and schedule an appointment today to avoid missing out on these patient openings."

Ashton says that the dental practice, which can be visited online at <http://www.lightlanedental.co.uk>, offers dental services for patients of all ages, from toddlers getting their first teeth to grandparents who may be in need of dentures or dental implants. She says that they are conveniently located for those in the area and that the address for access to driving directions to the practice can be found on their official website.

The dental practice has been serving patients in the area for more than four decades. The team of dentists focuses on the dental care needs of NHS and private patients and offers services and procedures that are designed to take the stress off of visiting the dentist. Ashton adds that all of their dentists and staff are highly qualified and compassionate individuals, focusing on the complete dental care and comfort of every single patient.

“Visiting a dentist can be a trying experience,” Ashton says. “Many people experience anxiety when it comes to having to undertake a treatment with their teeth. We understand that people can be frightened of the dental chair, which is why we do everything in our power to make certain that our patients are as comfortable in our chairs as they would be in their own chairs at home.”

Ashton says that those who would like more information about the dental practice can view their YouTube video at <http://youtu.be/uxSWFGx-tn0>. She adds that the practice uses the very latest in dental technology to ensure that each patient is completely satisfied with their results, no matter the procedure that they require.

The practice provides routine dental checkups, which are vital for protecting teeth and gums and keeping them healthy. Regular dental hygiene is essential in removing plaque and tartar on the teeth that could lead to cavities or gum disease. Ashton states that these are only a few of the many dental services that the practice currently offers.

“We offer the basic services, such as cleanings, x-rays and teeth whitening, as well as various cosmetic procedures that are designed to help our patients to get the smiles that they have always wanted,” says Ashton.

Cosmetic procedures range from veneers to implants and others, and are designed to meet the needs of patients of all ages. Ashton states that the practice also provides special facilities for disabled patients, with a ground floor treatment room, and the practice offers a wide range of needed dental supplies such as dental floss and toothbrushes.

The staff at the dental practice understand the need for families to have one dental practice that will meet all of their needs, which is why this dental clinic provides all of the services that a family would require for healthy teeth and gums. Ashton adds that those who rely on the NHS for their dental care can contact the practice to schedule their initial consultation, and she reiterates that these spaces are limited so families that are in need of a family dental practice should contact the surgery soon to schedule an appointment for each member of the family.

Those who are interested in learning more about the various services that the dental practice provides can

visit the Light Lane Dental website mentioned above for more information. The website offers direct contact information for those who would like to call or email, as well as an online contact form to schedule appointments, and a location map for directions to the office.
