

NHS Dentist In Coventry City Centre CV1 Accepting New Patient Registrations

May 02, 2019

COVENTRY, UK - May 02, 2019 - PRESSADVANTAGE -

Light Lane Dental Practice has announced that they are currently accepting and registering new National Health Service (NHS) patients. This dental practice has been serving the Coventry community for more than 40 years. And aside from providing dental treatment under the NHS, the practice also provides private dental treatments that are not covered by the NHS.

For getting general dental care tips and information, Light Lane Dental Practice welcomes registered patients as well as others to visit the Facebook Page of Light Lane Dental.

Sharon Ashton, practice manager at Light Lane Dental Practice, says, "We're happy to announce that we are currently accepting and registering new NHS patients. We are conveniently located opposite Barrs Hill School. This dental practice has been serving patients for over 40 years. Our team of friendly dentists focus on the complete dental care needs of both NHS and private patients, and aim to make your visit with us as comfortable and stress free as possible. The surgery uses the latest technology, so you can be sure to

receive quality dental care.?

Light Lane Dental Practice offers both general dentistry as well as cosmetic dentistry services. General dentistry services consist of a wide range of dental treatments. These include dental check ups, dental hygiene, single visit crowns, gum treatments, extractions, root canal therapy, sedation, dental treatment for children, mouth guards and splints, and emergency dental treatment.

Single visit crowns are provided by using a product called CEREC, which permits fast dental restoration. CEREC single visit crowns as a service is offered by just a select few dental surgeries in Coventry. With CEREC, a dentist is able to create within an hour a ceramic crown or veneer with the assistance of a computer system that makes use of CAD/CAM and 3D digital photography.

Light Lane Dental Practice offers high quality pediatric dentistry. This is important because the teeth of children are still in the developmental stage. Thus, the dental practice has dental practitioners who are highly trained in performing root canal therapy for milk teeth, putting space maintainers, and also fluoride application.

Cosmetic dentistry services at Light Lane Dental Practice include crowns and bridges, fillings, dental implants, traditional braces, Invisalign, Six Month Smiles, facial aesthetics, Fastbraces, lingual braces, inlays, dentures, Fibredontics, teeth whitening, and veneers.

For replacing missing teeth, dental implants while relatively new are now much sought after. This is because a dental implant behaves and appears just like a real tooth. The dental practice has trained implant dentists who have been placing dental implants for the past decade.

Six Month Smiles are for adults who are very conscious about their uneven front teeth and who often hide their mouth when smiling, laughing, or even talking. Many of these people don't want to wear metal braces for up to two years because of worries regarding costs and how they will appear in business or social events. Six Month Smiles offers a solution for such concerns by providing an affordable treatment with braces. Six Month Smiles are braces with clear brackets and tooth-coloured wires that are hardly visible. The average treatment will usually last for just six months.

Patients who have been treated at Light Lane Dental Practice have been mostly happy and satisfied with their results. For instance, one happy patient said, "For someone like me who is scared of dentists I must say a massive thank you to Hardip and assistant, excellent and very good at their work. After 30 years, I'm not scared anymore. Well done and thank you."

Light Lane Dental Practice is one of the longest serving dental practices in Coventry, with a proud tradition of

offering family dental care for more than 40 years. The team consists of highly trained dentists and nurses. The practice also offers access to dental practitioners with special interest in periodontics, orthodontics as well as implant dentistry.

Those who are interested in getting more information about the dental practice can visit their website at <https://www.lightlanedental.co.uk/> or contact them by phone or by email.

Those who are on their way to the dental practice and need to know the exact location of the dental practice can visit the dental clinic's Google Maps page at <https://goo.gl/maps/rcPWMqda83C2> for obtaining driving directions.
