Barber states that the company has 30 years of experience in the moving industry and they have seen it all. He states that they have a fleet of trucks and all the specialised equipment that is needed to get the job done properly. Barber says that it is easy to think moving heavy items like pianos and spa pools is all about brute strength but it?s not, there is an art to working in confined and tight spaces. Because of their size and their weight, special care must be taken when moving pianos as they are prone to damage if moved by people unfamiliar with exactly what is involves. Any harsh moving practices could cause the piano to become out of tune requiring a professional piano tuner to fix it at extra cost.

Barber states that he?s proud to offer obligation free quotes for every moving job they complete, he will often do site visits ahead of bigger jobs like office moves for example .The company also has a website where those who are interested can learn more about their specific services offered and they regularly post articles about the different types of services they offer so you can research information ahead of your move and also see testimonials from satisfied customers.
