

Tru Health Labs Launches 2nd Health Supplement Forskolin For Weight Loss

July 22, 2015

July 22, 2015 - PRESSADVANTAGE -

Lisle, IL company Tru Health Labs have recently released their second health supplement "Forskolin MAX 250" on Amazon. This is a supplement that focuses specifically on helping people to achieve significant weight loss. It is the highest potency Forskolin product on the market today, with 50mg of the active ingredient.

Tess Mahan, from Tru Health Labs, says, "Our first product, ReJuvenate Rice Phytoceramides Natural Facelift Formula, was released in November 2013 and has been very positively received. Since then, we have been developing various other products and we are proud to announce the launch of our second product. We expect it to be as popular as the first."

The Forskolin for weight loss product has been manufactured in the USA and has the highest clinical purity of all similar products on the market today. 20% of each 250mg capsule is active forskolin, which is the entire recommended daily dosage for achieving weight loss. The product has been third party tested to confirm this. Additionally, having been manufactured in GMP certified facilities, it includes no artificial ingredients, preservatives, additives, binders or fillers.

"Forskolin has been clinically proven to wake up a sleeping metabolism," adds Tess Mahan. "This means stored fats are quickly reduced and the difficult to reach areas, such as belly fat, are targeted in particular. Simply taking one tablet every morning before breakfast is all it takes to get to work."

The product was featured on a famous TV doctor show, where it was hailed to be a 'belly blaster', encouraging 'rapid belly melt'. It was also called 'lightning in a bottle'. Lisa Lynn stated on the show, "I make all of my patients take Forskolin because it really helps to enhance their metabolism. Forskolin has helped my clients double their weight loss."

The active ingredient in Forskolin Max 250 is *coleus forskohlii*. This has been clinically tested to provide significant benefits in weight loss attempts. Tru Health Labs believes in the quality of their product so much

that they have included a 90 day money back guarantee. One bottle contains 60 tablets, enough for two months of use, which means people can truly test it risk free.
