Andover Private Dentist Now Offers Cosmetic Dental Procedures In Hampshire, UK

May 06, 2019

May 06, 2019 -

Andover and Whitchurch, Hampshire, UK based Dental Concepts is pleased to inform local residents that they are ready to welcome new patients for cosmetic dental treatments. Be it whitening, straightening, or replacement of teeth, Dental Concepts aims to help its clients build a beautiful smile and thus increase their self-confidence by removing any flaws in their teeth. The clinic?s website can be found at https://www.dental-concepts.com/.

Dental Concepts provides a wide variety of dental services. It specialises in many dental treatments and has many membership plans designed to cater to different types of patients and their needs. The practice avoids providing ?cookie-cutter? style treatments to its clients. Each patient is treated as an individual, with a personalised treatment plan being created specifically for them. Treatment plans come with a transparent pricing structure, and payment options designed with the client?s financial situation in mind.

Food and drink, while necessary to maintaining a healthy body, can stain one?s teeth when consumed. Activities such as smoking worsen the problem and darkens the natural white colour of teeth to a dull yellow. Teeth whitening counteracts this by lightening the colour of an individual's teeth, returning them to their

natural bright white appearance. Dental Concepts offers a number of such teeth whitening procedures.

Office Zoom, for example, can help improve the appearance of teeth in as short a time period as one hour. ?Our Office 1-hour power whitening can whiten teeth by up to several shades, brightening your teeth dramatically to its natural shade,? says the dental practice treatment coordinator. ?Your lips and gums are covered and a gel is applied to your teeth. A special light is positioned over your teeth to activate the gel, which gently penetrates your teeth, breaking up stains and discolouration - giving whiter, brighter teeth in less than an hour!?

Dental Concepts further offers home whitening options for a more comfortable and convenient, albeit drawn out, solution to stained teeth. During this process, a whitening gel is placed in a custom-made tray which clients can wear while asleep, or for short periods of time during the day. This process normally takes about two weeks to show meaningful results, but gives the patient the luxury of simply applying the gel-filled tray within the comfort of their home instead of having to sit in a dental office for an hour or more.

Keeping one?s teeth free of plaque is very important when trying to create the perfect smile. Dental hygiene treatment involves professional teeth cleaning, often referred to as scaling and polishing. The dentist will also show the patient how best to keep their teeth free of plaque and help them avoid or treat gum disease. This is not strictly considered a cosmetic treatment, but the first step towards achieving a perfect smile is paying close attention to one?s oral hygiene. The dental practice has a number of videos that go into greater detail about several dental procedures on their YouTube Channel.

In addition to these services, the clinic is able to carry out gum contouring and teeth reshaping, which involves making small adjustments of the patient?s teeth to reshape and level their smile. ?By altering the way your teeth reflect the light we can help camouflage twisted or misshapen teeth without more invasive procedures,? says the dental practice. ?Your gums frame and drape your teeth. Like a beautiful picture in the wrong frame, if the levels and shape of your gums aren?t right, your smile may not look right. By altering the shapes of your gums, we can lengthen your teeth and improve your confidence in your smile.?

Other cosmetic services on offer include white fillings, smile makeovers, and porcelain veneers, all of which are performed by experienced professionals. The dental practice has received many positive responses from clients over the years. Lisa Willetts stated in a Google review, ?I had a mini smile makeover at Dental Concepts in Andover and all of my appointments were relaxed, considering the amount of work I was having done. Such a lovely, comfortable environment and the staff are so lovely and caring; nothing was rushed and all of the work was done to 100% satisfaction. Would thoroughly recommend this surgery.?

Patients seeking a trustworthy dental practice in the Hampshire area may contact Dr. Manish Chitnis and his team at Dental Concepts, or connect with the clinic through their social media channels. Their premises can
