

New Company Brings Their Furnace Cleaning Services To Calgary

April 23, 2019

April 23, 2019 - PRESSADVANTAGE -

Residents of Calgary seeking a reliable furnace cleaning service need not look any further than newcomer to the area, Calgary Furnace Cleaning. Armed with a commitment to do every job the right way, Calgary Furnace Cleaning wields a team of experienced and licensed HVAC technicians guaranteed to help keep the homes of Calgary residents warm.

Maintaining the cleanliness of furnaces and ductwork can help improve the air quality in homes while also ensuring that both systems keep running efficiently through the whole of winter. "Keeping your HVAC system clean and well maintained can help keep those winter heating bills down," says the company. "Should the worst happen, and your furnace breaks down, we'll be there for you 24 hours a day to get your heat back up and running." Find out more about the company at <https://calgaryfurnace.cleaning/>.

Calgary Furnace Cleaning prides themselves on providing consistent up front estimates on the cost of each project before they start their work. Knowing how much repairing or installing a furnace will cost puts the homeowner at ease, which is why the company makes sure that there are no hidden costs when providing their free estimates. Sometimes furnaces break down at very inconvenient times, such as in the middle of the

night when they are most needed and when finding a repair service is most difficult. In situations like this, finding a furnace repair service that one can rely on is nearly impossible, and this is a problem that Calgary Furnace Cleaning has set out to solve with their anytime service. "We offer 24 hour emergency service in the event that your furnace breaks down, even in the middle of the night," affirms the furnace repair company.

With winter on its way out, not many people consider doing any maintenance work during the warmer months. Considering the fact that the need for a furnace is not as great during winter, it only makes sense that not many people feel the need to think about their furnace. However, doing maintenance work on one's furnace during the summer can help avoid the need to do so during winter and thus help one avoid the unpleasant experience of a furnace breakdown in the middle of winter. Calgary Furnace Cleaning's qualified technicians have the knowledge and experience needed to ensure that one does not encounter any unexpected breakdowns all through winter.

"Our team of licensed HVAC technicians will start by cleaning and giving your furnace a thorough once over," says Calgary Furnace Cleaning. "We will make sure that your furnace is in good working order before we proceed with getting it cleaned, and make sure that all of the safety components that are built into your furnace are cleaned and working. We will change and clean your furnace filters, as clean filters help make sure that your furnace is running at peak efficiency. We clean and inspect the vent fan, indoor blower motor, and pressure switches. Regular furnace cleaning and maintenance extend the life of your furnace, an important advantage since furnaces are expensive to replace. Furnace cleaning will also help to keep the annual cost of heating your house to a manageable level. Home heating is costly enough as it is." Find out more at <https://calgaryfurnace.cleaning/furnace-cleaning>.

The company also offer Duct Cleaning services. The average Calgary home has more than 1000 feet of ductwork that, if it not cleaned regularly, fills up with dirt, mold, hair, dead insects, and other sorts of debris. While many homeowners remain oblivious to the potential health issues this may cause, experts recommend having the air ducts in one's home cleaned every five years, depending on the homeowner's lifestyle. Calgary Furnace Cleaning carries out thorough duct cleaning services to ensure the air quality in each client's home meets the strictest health and safety requirements. "We treat every home that we go into with the utmost care, consideration, and respect," the company states.

They explain that, "Our team will sit down with you and explain the exact process we are going to use to clean your ductwork. Our technicians use an abrasive spiral brush combined with powerful vacuums to make sure we remove every bit of dirt and debris from your duct work. We will make sure that all of the contaminants are removed from your ductwork and your home." For more on their duct cleaning services, visit <https://calgaryfurnace.cleaning/duct-cleaning>.
