## Mc Donagh Demolition Detroit Announces Services

*April 25, 2019*

April 25, 2019 - PRESSADVANTAGE -

McDonagh Demolition in Detroit has announced the kinds of services that they are ready to provide in Detroit, Michigan. Aside from demolition services, these include general contracting, sewer and water services, environmental remediation, site recycling, excavation, site development, and site preparation. Those who need more information about these services can check out their website.

Tim Cahill, spokesperson for McDonagh Demolition, says, "We can and will perform a wide variety of demolition related services, from interior demolition (and sometimes renovation), to the exterior projects to include excavation, grading, concrete removal, concrete installation, underground services, utility management from deconstruction to installation, all site work, both sewer and water, and also water management, contaminated soil removal, hazardous waste removal, oil and fuel tank removals" and all of the services described here, are performed for any sized project "from residential to the commercial and industrial sectors."

The demolition services provided by McDonagh Demolition can be subdivided into a number of categories. These include total demolition, foundation removal, selective interior/exterior demolition, site grading, remediation, and excavation. Demolition service is the specialty of the company because it started as a demolition company. It is a qualified Class A demolition contractor in the City of Chicago. The team members

from McDonagh Demolition are knowledgeable in all rules and regulations regarding environmental hazards including contaminated materials, asbestos, lead abatement, and removal of oil and fuel tanks. This also includes knowledge on Detroit demolition application.

In general contracting services, the company specializes in total demolition, excavation, interior and selective demolition, utility installation, concrete installation, grading, sewer and water, contaminated soil removal, water management, oil and fuel tank removals, and hazardous waste removal. The company has years of experience as a general contractor, which enables them to manage a project from the early design stages until the project's final acceptance.

Another important service area of McDonagh Demolition is turn-key environmental remediation and construction services. They can effectively handle environmental cleanup issues. They have completed projects that have required lead abatement, asbestos abatement, hazardous waste, non-hazardous waste and special waste remediation, underground/aboveground storage tank removal, and disaster/fire cleanup.

They also have expertise in extracting and removing materials in an area by machine or hand digging. Excavation services include demolition; site development; backfill; site preparation; removal of underground storage tanks; environmental remediation; removal of hazardous waste, non-hazardous waste and special waste; trenching; Berm creations; site balancing; and rough and fine site grading.

McDonagh Demolition also provides sewer and water services. They have the capability to replace, install and repair sewer and water lines in both residential and commercial sectors. They have already installed miles of pipes in and around the Chicago metropolitan area. The sewer and water services include: installation of new water/sewer piping and structures; demolition and excavation of existing piping and structures; repair of water/sewer piping and structures; provision of record utility drawings at project completion; and installation of water retention structures.

The company also has experience in site development services. These include grading; excavation; bituminous and PCC paving; stone base; site utilities; landscaping and restoration; storm water; retention structures; detention ponds; sanitary sewer; water mains and water services; lift stations and force mains; erosion control; surveying; land clearing; and environmental services.

The company can also help in preparing a site for new development. Their services in this area include: land clearing and grubbing; trenching; handling of clean and contaminated materials; dirt/spoil material transportation; site balancing; rough and fine site grading; excavation, backfilling and compaction; site utility work; recycling and disposal of materials; and removal of underground storage tanks.

Since 2008, the general contracting experience of McDonagh Demolition has been accomplished through

Job Order Contracts (JOC) with various entities such as the Public Building Commission of Chicago, Chicago Board of Education, Chicago Department of Environment, Chicago Department of Aviation, Cook County, and various private organizations, such as the future Mariano's at Elston Ave. and Ashland Ave.

Those who are interested in getting to know more about McDonagh Demolition can get company information on their website, or they can contact them by phone or by email.
