

Roofing Contractor Establishes New Offices In Flower Mound Texas

April 26, 2019

April 26, 2019 - PRESSADVANTAGE -

VR Roofing, a roofing contractor, has announced that they have established their new offices in Flower Mound, Texas. The company is well experienced in both commercial and residential roof repair, whatever the type of roof that is needed. They can provide roofing services for the home's metal, shake, tile, flat, or composition roof.

Gary Woodson, spokesperson for VR Roofing, says, "When it comes to replacing your roof, you really don't want to take chances, and should only hire a licensed and experienced Flower Mound roofing contractor for all your roofing needs. Our new offices in Flower Mound will allow us to serve better our residential and commercial clients in Flower Mound and neighboring areas."

Various kinds of services are available at VR Roofing. These include emergency roof repairs, roof maintenance, new roof installation, roof cleaning, garage roof repair, siding repair, dormer window installation, and roofing finance. Aside from Flower Mound, they also serve other locations including Addison, Carrollton, Keller, Roanoke, Allen, Colleyville, Frisco, Lake Dallas, Saginaw, Arlington, Coppell, Grand Prairie, Lewisville, Sanger, Aurora, DSH, Haltom City, and Little Elm.

Since the roof can get damaged at any time, particularly by storms, strong winds, and more, VR Roofing provides 24-hour emergency roof repair. A damaged or leaking roof cannot be allowed to remain for long as this can cause further damage to the home and may even pose risks to the residents of the home.

Another important service being offered by VR Roofing is roof maintenance. It is not really a good idea to just leave the roof not being cared for until it finally gives in and starts to leak or worse. The company offers regular maintenance to ensure that any leaks or minor damages to the roof are immediately repaired in order to prevent the damage from worsening.

And, of course, another key service provided by VR Roofing is new roof installation. They offer affordable but durable roofs that can be made from a number of roofing materials, depending on the preferences of the customer.

And then there is the need for regular roof cleaning, which can be provided by VR Roofing. Debris can accumulate on the roof, especially if there a lot of trees around the home. Leaves, twigs and dirt can accumulate, also causing water to accumulate on the roof, which can cause the roof materials to get damaged over time, resulting into roof leaks and other unwanted roof conditions.

Another service offered is garage roof repair. The roof of the garage also needs to be maintained properly because roof leaks and other damages can cause water to get in and possibly damage the car and other items in the garage.

Another part of the home that needs to be taken care of aside from the roof is the siding. VR Roofing offers repair and installation services for home sidings. This is important because the rain water can get inside the home not just through the roof but also through the sidings.

And, of course, dormer windows are sometimes found on the roof. This is a window that projects vertically beyond the plane of a pitched roof. Dormer windows are often used to enhance the usable space in a loft or attic and also provide the necessary ventilation and lighting. VR Roofing also provides services for the installation and repair of dormer windows.

Having a lot of experience in roof installation and repair, VR Roofing has already received mostly positive testimonials about the quality of their services. For example, Jose M gave them five stars and said, "This is a company that can be trusted. Their workers were constantly busy while repairing our roof. These guys really care and want the best for their customers and were happy to help me deal with the insurance company. Very highly recommended!?"

The Flower Mound roofing contractor has years of experience in providing roofing services. Those who are interested in consulting with VR Roofing with regards to their roofing needs can visit the company website or contact them by phone or by email.
