

RedhatCore Launches High Touch VPS and Dedicated Server Hosting Services

July 14, 2015

July 14, 2015 - PRESSADVANTAGE -

NEW YORK ? RedhatCore, a startup tech company, are VPS and dedicated server providers and have announced today that they have launched Flexible Managed Virtual Private Servers (VPS) and Dedicated Server Hosting services. RedhatCore?s VPSs and dedicated servers feature Solid State Drive (SSD) and SATA technologies. Pre-launch beta client engagements have resulted in positive feedback and an emerging reputation for RedhatCore as a high-touch, service and support-intensive provider. As part of the launch, the company is offering a limited time 50% discount on the first month for VPS and Dedicated server hosting.

?Everyone has racks and networks. We are about so much more,? said Salman Baig, CoFounder of RedhatCore. ?Of course, we have great technology and superb performance. That?s a given. This is a business based on trust. We put everything into establishing trust and backing up our word with exceptional customer care.?

Redhat Core offers 24/7 support by a technical staff that is earning numerous positive reviews as one of the best dedicated server providers from clients. The average support ticket time is 10 minutes. Notable

RedhatCore reviews include Tabish Shaikh of Luminative Solutions, who commented, "Their servers are some of the best I've seen - not only I was impressed by the customer service, but the quality of servers and their up-time is awesome." Another customer, Irfan Saleem of Couthy Media, added, "I am not a technical person, but whenever I need servers, I go to RedhatCore, their support team is awesome and within minutes they set-up websites for me."

RedhatCore's strategy to become one of the top managed VPS providers and dedicated server providers involves offering numerous free add-ons. These include Cpanel, Softaculous and real-time application performance monitoring. The company offers servers based on SATA and SSD Drives set up on Hardware Raid-10 with battery backup. All VPS nodes and dedicated servers are connected to premium 1Gbps uplink ports hosted in top tier I/O. Customers have multiple service package options to buy managed SSD VPS or also buy managed dedicated servers.

Salman Baig, Co-founder of RedhatCore, is a professional Internet marketer and search engine optimization strategist. RedhatCore is a Sub Company of AskForHost Web Hosting. Askforhost was Founded in July 2011 and now serves thousands of customer's world-wide.
