

## **Mr. Chem-Dry Offers Utah Carpet Cleaning Services**

*May 06, 2019*

May 06, 2019 - PRESSADVANTAGE -

Mr. Chem-Dry, a cleaning services company based in Centerville, Utah, has announced their Utah carpet cleaning services. The company serves the cities of Ogden, Salt Lake, Provo, and Centerville, including the counties of Weber, Davis, Utah, and Salt Lake. The unique advantage of their cleaning process is that it makes use of a carbonated solution that is safe and Green Certified. They apply the solution on the carpet using the Powerhead tool that has a patented Amplified Extraction capability so that it glides, spins and sucks the dirt, grime, dust mites, and other impurities.

Daryl Olsen, spokesperson for Mr. Chem-Dry, says, "We are happy to be able to offer our unique and environment-friendly carpet cleaning service for Utah. We clean to promote your health. We clean to ensure that both you and your family have a clean and healthy home to enjoy. We ensure your satisfaction with a 10-step cleaning process. We do all this so that when our head hits the pillow at night we can rest easy knowing that we provided the best value for investment to our customers. If and when we make a mistake, which every business and company does, we get right back to correct it. Depend on Mr. Chem-Dry for all your Utah carpet cleaning, rug cleaning, upholstery cleaning, allergy relief and pet odor removal needs."

Aside from carpet cleaning, Mr. Chem-Dry also offers rug cleaning, using the same proprietary carbonated cleaning solution that they use for carpet cleaning. Cleaning rugs is practically the same as cleaning carpets

except for a number of differences. First of all, rugs tend to suffer more abuse because they are usually positioned in those places of the home where people usually walk. Thus, rugs may need more cleaning but care should be taken because some rugs may be of great value to the homeowner or some other family member.

Another service being offered by Mr. Chem-Dry is granite countertop restoration. Many homes have granite countertops because granite is a beautiful and durable material for the countertop in the kitchen. Many prefer granite because it can be made to have a beautiful finish, which is expected to last for many years. However, there will inevitably be a time when the finish will lose its original luster. When it is still brand new, the granite is sealed with a sealant but over time, the sealant will wear thin and water and other liquids spilled on the countertop will gradually seep down into the pores of the granite.

Over time, dirt, bacteria, water and other materials enter into the granite thereby substantially diminishing the shine of the granite countertop. The granite countertop restoration service makes use of the same proprietary carbonated cleaning solution that can be used to extract the bacteria, dirt and foreign materials that have found their way inside the granite and then the granite is sealed again to ensure that it regains the original beautiful finish.

Mr. Chem-Dry also provides tile cleaning services. This service can remedy tarnished tilework and grimy grout so that homeowners will no longer have to hide those stained tiles and dirty grout by placing a rug over them. Mr. Chem-Dry's tile and stone cleaning solution reduces the bacteria and dirt that can spread germs with the result that the tile surfaces will sparkle and be safer for family members and pets.

Meanwhile, an independent laboratory had recently examined the efficacy and healthfulness of Mr. Chem-Dry's tile, stone and grout cleaning process and found that in conjunction with a sanitizer, it gets rid of an average of 98.6 percent of bacteria from the surfaces. And just like with the granite countertop restoration, the team from Mr. Chem-Dry will apply a sealant over the tiles to prevent dirt and germs from seeping into the porous tiles.

Those who would like to know more about the carpet cleaning services offered by Mr. Chem-Dry can visit their website or call them on the phone or contact them by email.
