

## Lancaster Towing Company Launches Updated And Modernized Website

*May 01, 2019*

May 01, 2019 - PRESSADVANTAGE -

Pennsylvania based Best In Town Towing Lancaster is pleased to announce that they recently launched a new website, with a modern design and intuitive user interface intended to make browsing an easy and straightforward experience for visitors. The towing company states that their redesigned website enables prospective customers to quickly find information regarding the company's roadside assistance and emergency towing services.

"As a company that offers 24/7 services to motorists in Lancaster and the surrounding areas, our aim is to provide responsive, fast, efficient, and reliable towing services to our local customers. We understand that it is difficult for people to get stranded on the road, especially during the wee hours; that's why we redesigned our website to load seamlessly on all devices, especially on mobile phones, to quickly help those who need immediate assistance on the road. Being stranded by the roadside with an immobile car is a highly frustrating and slightly humiliating situation to be in, so it is imperative to contact an honest, reliable, and professional tow truck service provider," says Gary Helms from Best In Town Towing Lancaster.

Meanwhile, Helms points out that Best In Town Towing Lancaster is among the most trusted companies in

the area that offers a quality towing service and roadside assistance for small cars, light vehicles, RVs, heavy-duty vehicles, semi-trucks, buses, motorcycles, and more. He says, "For more than two decades, Best in Town Towing Lancaster has been striving to provide outstanding services to the local community. We take great pride with our work ethics, and ensure that each job is done to the highest level of standards so our customers can have peace of mind whenever they use our transportation and vehicle breakdown recovery services."

He also explains that all of their drivers are insured, licensed, and highly trained professionals who strictly adhere to the company's safety standards. Furthermore, the towing company offers a full range of professional services that include emergency roadside assistance, medium duty towing, heavy duty towing, flatbed tow service, dead battery replacements, and many more. A full list of the services they offer can be viewed on the company's new website.

Best In Town Towing Lancaster understands that auto mechanical problems and breakdowns happen unexpectedly, which is why they provide an on-call 24/7 towing services in the greater Lancaster area. Helms states that they are able offer an immediate response at all times due to the fact that the company has a number of operators located across the city. This practically means customers can be certain that they will only be waiting for a short period upon contacting the company.

In addition, Helms says that they have all the necessary equipment to effectively and safely tow a car to a dealer's service location or auto repair shop. Their drivers and operators are experts with the local towing laws, and the company regularly interacts with Highway Patrol and AAA for emergency roadside assistance and breakdown towing. Furthermore, they strive to provide excellent services every single time that they help a motorist in need. He asserts that, "Our drivers and operators are friendly, professional, and courteous and we ensure that our customers are always treated with the patience, respect, and care that they deserve."

As a precaution, Helms reminds drivers and motorists to regularly check their vehicles to ensure their efficiency and reliability. He advises car owners to check under the car to see whether there are obvious leaks, because driving with leaking fluid may cause failure in the steering, brakes, or radiator. Next, he recommends checking tires to ensure that they are properly inflated and there are no obvious signs of excessive wear, because a damaged tire could lead to serious accidents. Helms adds that it is important to check a car's fluids regularly, and the battery must also be tested before going on long trips. He advises motorists to, "Check your battery for signs of corrosion on the terminals or for signs of cracks and leaks." Finally, he reminds motorists to make sure any spare tire is inflated and serviceable, and the jack is present.

More information can be found on the company's website at [towing-lancaster.com](http://towing-lancaster.com). Interested parties may also contact Gary Helms from Best In Town Towing Lancaster, or call the company's service hotline to learn more about their services.
