Provider Of Affordable AC Installation In Louisville KY Gets Another Positive Review

May 08, 2019

May 08, 2019 - PRESSADVANTAGE -

Breckinridge Heating and Cooling, based in Louisville, Kentucky, has announced that they have received yet another positive review, which is proof that their affordable air conditioner installation services are really appreciated by their customers. The company specializes in the repair, maintenance, and installation of air conditioning units, heat pumps, furnaces, and boilers. Their technicians are certified and capable of providing services for popular HVAC brands.

Mark Mason, owner of Breckinridge Heating & Cooling, says, "We are so happy and proud to announce that we have received yet another positive review from one of our customers. This shows how important it is to carefully choose a professional HVAC company that can be relied upon to provide the necessary services."

In the latest review, Jack H. said, "When my air conditioner stopped working late Sunday night, I called Breckinridge and they came out the next morning. After determining the issue, they gave me a quote to repair the ac, but advised that since the system was 20+ years old, that it was just a matter of time before I'd need to consider replacing the whole system. And that I would save some money over time with a more efficient

unit. There was no sales pressure, they simply presented quotes for both options and let me decide. I didn't want to risk more issues so I choose to go ahead and replace both the furnace and ac. Their team was fast and had everything switched out within a few hours that same day. Great experience overall!?

This local AC repair company in Louisville, KY, offers various HVAC services. These include heating repair, heating replacement, cooling repair, cooling replacement, and HVAC maintenance.

With summer fast approaching, people will soon rely on their air conditioning units to escape the sweltering heat of the southern summer. If the AC unit would not turn on, that would be a significant problem because the comfort of the whole family will be compromised. This is the reason why Breckinridge Heating & Cooling is available 24/7 to be able to serve homeowners who need emergency services, such as the repair of an AC unit.

The most common problems encountered by Louisville homeowners with their AC units include the situation where: the AC unit will not turn on; the AC unit will only hum but the fan does not work; there are loud and odd noises or vibration while the AC unit is running; there is water around the AC unit base; and the AC unit is not cooling but instead is blowing warm air.

The technicians from Breckinridge Heating & Cooling are well-trained in solving the problem of the AC unit and they will also provide a solution that will prevent future problems. The diagnostic process that they use looks at the core systems of the AC unit. The common problems and solutions include: power issues, which is remedied by finding out why there is no electrical power for the system; fan motor or fan belt replacement; copper tubing replacement because the tubing has developed a leak; and flushing of the system because it has a clogged condensate drain.

Breckinridge Heating & Cooling advises homeowners to have their HVAC units undergo regular maintenance. The advantage of regular HVAC maintenance is that there is less chance of the entire system failing suddenly, and the homeowners can even save on costly repairs. Furthermore, by having the heating and cooling system cleaned regularly, air contaminants are drastically reduced thereby decreasing the risk of allergies and other sicknesses in family members. Regular maintenance will also prolong the life of the HVAC system. And most important of all, homeowners get to save on their energy bills because regularly maintained systems are more efficient and cost less to operate.

Breckinridge Heating & Cooling has been in business for more than 50 years. They are capable of providing residential and light commercial maintenance, installation, and repair services for all types and brands of air conditioning equipment, furnaces, boilers, and heat pumps. They are willing to provide free estimates on replacements and new installations. They also will not charge extra during weekends. They are open 24 hours a day, from Monday to Sunday.

Those who are interested in HVAC repair in Louisville KY can visit the company website or they can contact them by phone or email.
