Pride & Cleaning Restoration Offers Emergency Cleanup Services For A Flooded Basement And More

May 06, 2019

ST. LOUIS, MO - May 06, 2019 -

St Louis, Missouri based Pride Cleaning & Restoration recently issued a public advisory regarding the heavy rains over the last few weeks and how the recent weather caused water damage to homes and properties in the area. Pride Cleaning & Restoration states that they are one of the few service providers in Illinois and Missouri who provide professional flooded basement cleanup, mold removal, sewage extraction, and fire/smoke damage restoration services.

?Flooded basements during the spring is a very common problem. Water in your basement can extensive property damage and be very frustrating for homeowners. Immediate flood water cleanup and removal is necessary to help prevent mold and mildew buildup because these fungi can pose significant health risks and can cause serious damage to a property,? says Jim Seubert from Pride Cleaning & Restoration. He explains that mold, especially black molds, are toxic, and thrive on surfaces like fiberboard, wood, gypsum boards, and even paper. This specific type of mold grows in damp and warm environments such as bathrooms, laundry rooms, and basements, and can spread exponentially in no time.

Seubert also states that black mold can release harmful toxins in the air, and inhaling these toxins may result

in a variety of health issues which include allergic reactions, coughing, wheezing, itchy skin and eyes, sore throat, and nosebleeds. In worse cases, exposure to black mold cause severe headaches, asthma, hay fever, and Chronic Obstructive Pulmonary Disease (COPD), among others. In fact, according to the Center for Disease Control and Prevention (CDC), a number of studies suggest that young children who are exposed to mold toxins early on in life may be more likely to develop asthma and other respiratory diseases.

On the other hand, Seubert warns that getting rid of mold is not an easy task because these fungi can easily spread their spores inside the house when disturbed. However, preventative measures can be taken to prevent mold from invading living spaces. He recommends regular cleaning of damp and wet areas where mold is likely to grow, such as bathrooms, showers, and basements. Next, he states that using a dehumidifier reduces the moisture in the air, keeping walls and surfaces dry. ?You must ensure that rooms are warm and well-ventilated, especially during the cold and rainy seasons. Fitting and using exhaust fans in damp areas, such as bathrooms and kitchens, may also help to control the level of humidity,? says Seubert. He also recommends that homeowners regularly check pipes, gutters, and air conditioners to prevent mold from thriving on surfaces that are hard to notice.

As noted on the company?s website, Pride Cleaning & Restoration is a full-service water damage St Louis restoration, mold remediation, contents restoration, and fire damage restoration company serving the greater Illinois and Missouri regions since 1987. Their service area now includes the Madison and St Clair counties in Illinois as well as St Louis, St Charles, and Jefferson counties in Missouri. The company explains that they specialize in both residential and commercial water damage restoration and flood water cleanup. ?The Pride Cleaning & Restoration team is on call 24/7 to attend to all your restoration emergencies. Our water damage technicians are courteous, fully trained, and have years of onsite experience to deliver professional and quality cleanup and restoration services. You can trust us to get the job done professionally and efficiently, to your expectations, satisfaction guaranteed,? says Seubert.

Pride Cleaning & Restoration is regarded as one of the most trusted local businesses in the greater Illinois and Missouri areas, as illustrated by the positive reviews and recommendations the company receives online.

?Jim, Susan, and the team at Pride Cleaning & Restoration are awesome. I personally worked with them as well as many of my clients. As an insurance agent, I appreciate the attention to detail and the professionalism they bring. They showed up at our house at 10:30 on a Friday night to handle the sewer water leak we had. They helped with every aspect of the claim process, including working with the adjuster to make sure nothing got missed on our insurance claim. They are a family owned business that I have had the privilege working with for years. If you have any issue with water damage and are in need of water restoration St Louis, only trust Pride Cleaning & Restoration,? says JR Bell in a Google review.

Another satisfied homeowner, C Schomber, said, ?We had a water pipe break and our insurance agent called Pride Cleaning & Restoration. They came quickly, stayed until the job was done, and came back to monitor the final stages of clean up. The technicians were friendly, knowledgeable, professional, and understanding. I hope we never have another emergency, but if I do, Pride Cleaning & Restoration has earned my business.?
