

Tiger Paving Calgary Announces Opening Of Spring And Summer Paving

May 08, 2019

May 08, 2019 - PRESSADVANTAGE -

Tiger Paving, a paving contractor based in Calgary, Alberta, has announced their opening for Spring and Summer paving services. Their services may be needed by those who want to have a driveway in their home or a parking lot for a business, or those who want some dirt roads to be paved. Their licensed technicians are ready to provide advice on the kind of paving that is required for each particular situation.

The paving contractor can provide asphalt paving for driveways and acreages in Calgary and surrounding areas. A paving specialist from the company can provide advice on the decisions to be made by the client, such as deciding on the base options, thickness of asphalt, or whether asphalt should be used or some other material, like concrete.

John Lambert, one of the owners of Tiger Paving, says, "Spring is here and we have openings that are filling fast for paving bookings in and around Calgary Alberta. Thinking about having your driveway paved? Have an acreage that needs a road paved? A business owner has a parking lot that needs updating after the long winter? With regards to our service area Calgary residents may want to check it out. It basically includes the city of Calgary and its neighbouring areas."

The company can also offer paving services for parking lots, parking pads, and even commercial parking lots. It is pointed out that asphalt is usually a better choice for parking pads and commercial parking lots, compared to concrete. This is because asphalt is usually more than 50 percent less expensive than concrete. Also, asphalt is much faster to install, and it can be used very soon after it has been applied, unlike with concrete, which needs a long time to cure before it can be driven on.

Another service that Tiger Paving can provide is the resurfacing of an existing asphalt surface. This is usually less expensive and has a faster turnaround time than performing a complete tear up and repave. Resurfacing can be done as long as the existing surface is not too damaged with base failure or cracks. Team members from the company will inspect the asphalt surface and base thoroughly including slope and grade. With a quality resurfacing job, at least 15 years can be added to the life of the existing asphalt paving.

The company can also provide pavement repair service, which includes patch repairs, crack seal, and seal coating. The potholes, spider-web cracked areas, and other broken areas of pavement will need to be repaired. One indication of the need for repair is the presence of areas that appear like an alligator skin. Those failed areas can be cut out and asphalt can be re-installed on those areas after performing adequate base inspection and compaction.

Meanwhile, feedback from past clients have been positive, indicating that Tiger Paving indeed provides quality paving services. For instance, a commercial client said, "We're very happy with the professional service we've received from Tiger Paving. Quality work, short time frame, and at a reasonable price! We will be happy to have them work for us in the future." Residential clients were also impressed. Joseph L. said, "I was very impressed with Tiger Paving. They were courteous and professional. They worked around my schedule and my driveway looks great!"

John Lambert says, "Customer Satisfaction is our #1 goal at Tiger Paving Calgary. We are dedicated to growing as a company through quality work and great service. As a growing business it is important that we establish a solid connection with our clients for repeat business and excellent referrals. We specialize in both commercial and residential asphalt paving. We do asphalt resurfacing, pavement repair/patching and speed bumps. We also do crack-filling to prevent your asphalt from deteriorating over time. We work around your schedule and keep to our estimated budget."

Tiger Paving has been operating in Calgary for more than 10 years. Those who require some paving in Calgary may want to visit their web page at <https://www.tigerpaving.com/services/>, or contact them by email, or call them on the phone.
