

We Tint Las Vegas Offers Mobile Tinting Service, Windshield Repair, and Auto Detailing

May 08, 2019

May 08, 2019 - PRESSADVANTAGE -

We Tint Las Vegas is pleased to announce on-site window tinting services in the Las Vegas area. They have over 20 years of experience with tinting, windshield repair and replacements, and auto detailing. With such experience, the company has stated that they have the necessary expertise required for any job.

When asked about his tint services, here is what the owner had to say, "Well, living in Nevada, it is kind of a no-brainer. The sun gets hot, the air gets hot, your car gets hot. I'm honestly not sure how anyone can live here without having tinted windows, but they do. I am glad to provide on-site window tinting services when they are ready for a better experience."

The company was started over 20 years ago. The Owner only had the basic tools necessary to get the job done and had to rely on word-of-mouth to get new business. Slowly, the business grew into the well-reviewed business it is today.

In the past, the company focused on windshield repair and replacement services, but as his business grew, he added more services. In 2013, he started offering auto detailing for cars and trucks, then in 2016 he

expanded detailing to RVs, motor coaches, and Prevosts. Finally, late last year, he decided to include car window tinting. The Owner had been doing it for himself, friends, and family for years, and finally decided it was time to become a part of the brand.

Window tinting is incredibly important in a high-temperature environment such as Nevada. Towns in Vegas Metro like Henderson, Boulder City, and North Las Vegas, tend to need a reprieve from the heat the most. This is where tinting comes in handy, allowing a car to stay cooler during the day while in direct sunlight. Otherwise, the interior of the car can reach 123 degrees after only an hour.

In a study performed by ASU and UC San Diego, the dashboard of one of the cars reached 192 degrees - a temperature that will burn the skin when touched. Window tint will cut down on how fast the temperature of the interior of the vehicle rises and also reduce how much AC is needed to cool down the car once started.

We Tint Las Vegas has a reputation of offering convenience and personal care. The make sure that clients feel like a priority and that the services rendered meet a rigid standard. Most could expect that quality is sacrificed at the cost of convenience, but not at We Tint Las Vegas.
