

These are amazing!

These are amazing! My glasses are always getting smudged and dirty with a busy life and two small children and these are super easy and convenient and clean them without streaks.

Great Lens Wipes

Great product, excellent Customer Service, we will be buying these again and give our high recommendation.

★★★★★

Lara E.

Great wipes... absolutely lint free

Much better than the lens wipes that I have purchased many times before, the Lenzies are larger than the other wipes and are truly lint free. I cleaned a couple of pair of glasses and there was enough moisture in the wipes to clean both without any problem... the smaller wipes usually dry out after the first pair.

Five Stars

Lenzie's work great! I can see clearly now. My iPhone and surface screens look brand-new!

Lenzies Lens Wipes Receive Raving Reviews

July 20, 2015

July 20, 2015 - PRESSADVANTAGE -

Choice Pod, a business in Hawthorne, CA recently released their Lenzies, which are lens cleaner wipes, on Amazon. Since having been released, the product has been very positively reviewed by customers, and has received numerous raving reviews on Amazon, from where the Lenzies can be purchased.

"Naturally, we fully believed in the quality of our product when we released it," says Jasmine Sanders from Choice Pod. "At the same time, however, we were aware of the fact that there are already many similar products around and it was going to be a hard market to break through. We are incredibly pleased to see that our Lenzies have been so well received and that people have truly noticed how different we are."

Users have been leaving positive reviews on each of the things that make this product so different from others. Individually packed, the Lenzies can be placed in pockets, in the car, in a bag or anywhere else. When unwrapped, each wipe measures 5" by 6", making them large enough to tackle even the biggest screens. Additionally, the size means that a single wipe can clean as many as four different items.

"I had a chance to use these Lenzies eyeglass cleaning pre-moistened wipes, and am totally hooked!" says David Murphy on Amazon. "I love how the box is small, yet there are 100 wipes! Totally impressed with the usage of the package. The individual packages are slim enough to carry one in your pocket, wallet, or carry

them around in a purse or backpack. It does dry super fast without leaving any type of streaks or water spots."

The Lenzies are designed to leave no streaks, fog or static. They can be used on glasses, cameras, smartphones, tablets, computer screens and any other such type of screen. Because all the wipes are individually wrapped, they are also completely sanitary. The positive reviews that have been coming in have noted this and much more. "These are very effective at not only removing grime and grease from glass and similar surfaces, but they are quick drying. I use an ample amount on my eyeglasses and they were spotless (and streakless), and dry within seconds," says Mike Tarrani.
