

ZAPABLE REVIEW

Zapable: Review Examining Andrew Fox and Chris Fox's App Builder Tool Released

July 14, 2015

July 14, 2015 - PRESSADVANTAGE -

Zapable reviews have been popping up all over the Internet and InventiveExposure.com reveals the truth about this program that claims to have taken the complication out of creating an amazing app and made it so easy that even one's grandmother could do it.

Houston, TX July 13, 2015

Zapable has positioned itself as "The World's Easiest To Use And Feature Rich App Builder Tool". This has caught the attention of InventiveExposure.com's Stan Stevenson, prompting an investigative review.

"Our Zapable review shows that that this is the most user-friendly way of creating an app that you will find out there. It is a drag and drop type software that allows you to create a unique app that includes everything you need to represent yourself or your business and make it a success," reports Stevenson. "Even though you can pretty much do anything with this app, you don't need any experience, and you don't need any coding

skills. You can adjust the look and feel of your app by personalizing your icons, layouts, colors, header, background and more. There are over 27 features for you to choose from as you create your app.?

Zapable enables users to add an RSS feed to their blog, a video gallery, an opt-in form, their social media accounts and even an Amazon catalog that is so easy to build. They can also display a Twitter feed associated with their business, add coupons in their app even for a limited time to create incentive, display their products in a catalog, create loyalty cards for their business, create an audio gallery for their app users and monetize their app.

?You can build an app with no experience and no coding experience in just a few minutes. Much of the creation is drag and drop and all the tutorials you need are found inside the community. The product helps you become more successful no matter what niche you are in,? says Stevenson. ?The training even helps you spot emerging trends to have more success; you can add YouTube videos or custom videos to your app. There are hundreds of app icons to choose from. Get everyone who has downloaded your app back to your site or business with enticing and targeted push notifications that they can?t miss when you add something new.?

?If you have any kind of business or online presence, then creating an app through Zapable can help you connect with interested people like never before. After reviewing it for ourselves, we guarantee that their claim is absolutely true. Satisfaction policy ensures that you will get your first app up and running successfully. The product gives you an easy and simple way to create an app that connects you to your customers and followers almost 24 hours a day. Plus, Zapable gives you the ability to send push notifications, which is essential to keeping your business in front of people who are interested in it. It?s like being able to reach interested people and tap them on the shoulder, and it can help push your business to new heights.?
