

Implant Centre Martinko Launches New Website

May 10, 2019

May 10, 2019 - PRESSADVANTAGE -

The Trieste, Italy based Implant Centre Martinko is pleased to announce that they have launched a brand new website to promote their new Trieste Dental Studio.

The clinic's new website has been designed from the bottom up to work across any computer, handheld device, or mobile phone. Visitors to the new website may now call the Dental Studio directly from their phone or computer. It also lets them send a message and even attach their own x-rays so that the Dental Studio has all the information they need on hand when the patient visits. The website can be found at <https://www.implant-centre-martinko.eu/>.

Visitors to the website can learn more about the services provided by Implant Centre Martinko, including Dental Veneers, Crowns and Bridges, Dental Implants and Prostheses, as well as Dental Bone Grafts.

Their new Dental Studio is located in the centre of Trieste, convenient for both residents and holiday makers who want to take advantage of the affordable costs which Implant Centre Martinko offers. The studio can handle all kinds of dental work, including individual Dental implants as well as their All on Four and All on Six implant treatments, which are permanent, fixed solutions which will look just as natural as a patient's own teeth in just one day.

All Implant Centre Martinko dental studios are equipped with up to date technology and high-quality materials that enables them to offer all patients an accurate diagnosis and recommended appropriate treatments. They are represented by a team of experts with over 10 years of experience in the field of dental medicine, and their professional and skilled staff provide treatments in accordance with the highest international standards, ensuring top quality therapy coupled with an individual approach to patients. By continuously investing in the know-how and education of their staff, new equipment, and materials, and constantly monitoring the advances in science and technology, the clinic is able to stay at the forefront of providing the best possible solutions to dental problems at affordable costs.

Dr. Damir Martinko of the Implant Centre Martinko added that, "We're so excited to offer our All on Six dental implants service. Our patients no longer have the instability that often happens with more traditional solutions. Now, they can enjoy eating, drinking, talking, and laughing with their loved ones and other people without becoming self-conscious of their teeth." They can also perform a maxillary sinus lift, which raises the nasal sinus floor to increase the bone volume necessary for the insertion of dental implants. It is usually done at the same time as the insertion of the dental implant if needed.

Many people opt for the All on Six treatment because it has several advantages over the All on Four version. With six dental implants strategically distributed throughout the mandibular or maxillary bone, the fixed prosthesis is then affixed. This provides more stability and is more suitable for patients with reduced bone density, or in patients with poor and insufficient dental bone structure. The most significant benefit for both the All on Four and the All on 6 methods is that this is a relatively simple insertion procedure, and it allows the patient to get new fixed teeth in just one day.

At Implant Centre Martinko dental studios, every patient has an initial examination and diagnostic tests using state-of-the-art diagnostic tools such as radiovisiography, radiography, and cone beam computed tomography. Dr. Martinko added, "Whatever treatment or technique we use to help our patients, it is very important to maintain the correct oral hygiene and perform regular clinical checks. That is the way our patients make sure that their smiles stay beautiful every day of their lives."

Those who wish to book an appointment at the new Trieste Dental Studio can do so directly from their new website. Interested parties may also contact Dr. Damir Martinko of the Implant Centre Martinko, or connect with the clinic through their social media platforms to learn more.
