

Implant Centre Martinko Is One Of The Best Dental Implantology Clinics In Trieste Italy

May 13, 2019

May 13, 2019 - PRESSADVANTAGE -

Implant Centre Martinko has announced that they have developed the reputation of being one of the best dental implant clinics in Trieste, Italy. This is because of their high percentage of success and their use of the most up-to-date technology. According to them, the dental implant is considered to be the best solution for a missing tooth because it fits into the jaw and can act like a real tooth. And with the use of biocompatible materials and the most modern technology, patients get a functional and the best aesthetic solution for their missing tooth.

Dr. Damir Martinko from the Implant Centre Martinko says, "An insufficient amount of bone tissue will not be an obstacle in the path to reach the goal of a healthy smile. The painless intervention of bone graft will allow us to insert a dental implant to the patient, returning a smile of satisfaction to his face. In our clinic we use Straumann and M.I.S implants which thanks to their quality, guarantee the best results."

Knowing that most patients are quite busy, the implant clinic uses the immediate loading protocol for its dental implants. What this means is that only one session at the clinic is required and only one implant operation is needed to restore the patient's smile. With the said protocol, one or more teeth can be removed

in a single day, insert dental implants, and put in place temporary prostheses so that the patients can immediately return to what they are doing in their daily life.

The dental implant is a fixed prosthesis that serves as an optimal solution. Unlike the mobile dental prosthesis, the fixed prosthesis cannot be removed, which means it provides patients with additional safety and stability. Patients will be able to eat with it and eat all kinds of food and still feel extremely safe. Also, oral hygiene activities like brushing teeth can be performed perfectly.

Meanwhile, the all on four implant-prosthetic technique offers a fully functional and aesthetic set of teeth for patients in just one day. In just one dental visit, four dental implants will be installed and patients will get a temporary prosthetic implant. The all on four method is totally painless and can be done with local anesthesia, but if the patient prefers it, it can be done under conscious sedation.

In addition to the all on four technique, there is also the all on six technique for solving the complete loss of teeth. This advanced method that is based on six implants can also be done in a single day. It is durable, reliable and stable. And just with the all on four method, the all on six technique can be done under local anesthesia or under conscious sedation.

For those who prefer it, the mobile prosthesis can also be provided by Implant Centre Martinko. It is the simplest and most affordable solution for patients with lack of teeth. Two options are available. There is the partially mobile prosthesis, which is useful when the patient lacks a certain number of teeth. And there is the totally mobile prosthesis, which is recommended when the patient has total lack of teeth.

There are also other dental prostheses available at Implant Centre Martinko. For instance, there is the semi-fixed prosthesis. The benefits of the semi-fixed prosthesis is stability and easy maintenance of oral hygiene as it can be removed with a simple click while the pillars of the prosthesis provide better stability and safety for the patient.

Implant Centre Martinko can also provide dental crowns, which are necessary when a procedure requires opening the tooth. The dental crown can prevent fracturing of the remaining tooth. The clinic provides various types of dental crowns, which will be recommended to patients based on their aesthetic preferences and their dental condition. Materials used include ceramic-zirconium, ceramic-metal, or all-ceramic.

Those interested in getting more information about the dental procedures offered at Implant Centre Martinko can visit their website or contact them by phone or by email.
