

Dr. Dennis Buckley Shares A Program On Making Successful Chiropractors

July 22, 2015

July 22, 2015 - PRESSADVANTAGE -

A Doctor of Chiropractic Medicine and Former President of the California Chiropractic Association in Pasadena, Dr. Dennis Buckley has released a program called The Hole In Your Diploma for the making of successful chiropractors. Knowing the real struggles in the chiropractic profession, Dr. Buckley developed the program that teaches valuable networking, marketing and sales techniques in the field of chiropractic.

Armed with passion to inspire and help, Dr. Buckley also wrote a book entitled SCORE Student Chiropractors On Road To Excellence circa 2012, to help doctors and students become successful in their career. In his book, Dr. Buckley gave pointers as to how a student and a healthcare practitioner can be on the road to success.

As part of the whole process, Dr. Buckley started interviewing over 90 successful chiropractors about the things they consciously and unconsciously did and developed to better their craft. He then consolidated all the knowledge from different luminaries in the field of chiropractic. From there, Dr. Buckley was able to draw conclusions regarding trends, philosophies and practices of the said successful people which can also be read at The HOLE In Your Diploma Vol.1

When asked what made him decide to write the book, Dr. Buckley said, "I have a passion for my career and would like to share my humble thoughts on how students and struggling chiropractors can be very good in this profession. You see, you can't learn everything from school. Schools will only teach you the basics when it comes to science and other academic stuff, but it will not teach you how the real world works. This is something that I'm hoping to impart to the readers. I want them to realize that there are habits and principles that can actually help them better understand the world of chiropractics. It is very exciting and fulfilling, yet it can also be stressful and painful when you don't know how to deal with the difficulties involved in this business. It's not really a chiropractic business, but more of like marketing, sales and advertising business of personality and skills. Once they learned all of these, I'm sure they will soar to greater heights in the field of chiropractic."
