

Website Relunched To Display Vast Catalogue Of Aluminium Windows And Bifold Doors

June 18, 2019

June 18, 2019 - PRESSADVANTAGE -

Kuluin, Queensland based Vision Solutions Glass & Aluminium recently moved their website to a new domain, making it more accessible to their customers. In the process, the company has also upgraded the platform to better serve their online visitors.

The website's upgrade is designed to incorporate the feedback of the company's loyal customer base, building on the previous iteration's strengths and extricating any aspects that made the browsing experience more difficult. According to the company, the website is intended to function as a platform that allows residents of the community to easily navigate through Vision Solutions Glass & Aluminium's catalogue of products.

Brad Sharps, of Vision Solutions Glass & Aluminium, said, "We have been working on the redesign for a long time, and we're excited for our customers, new and returning alike, to visit us online and see what has changed. We gathered all of our customers' feedback on our old platform and tried to improve on every aspect that we thought was lacking. Throughout the development process, we always kept our customers' ultimate convenience in mind. Our main priority was to create something easy to navigate so that customers,

regardless of their age or experience online, can find whatever they're looking for. It also had to be something that represented our company and distinguished us from our competitors."

The end result is a website that speaks of Vision Solutions Glass & Aluminium's excellence as a company. The platform is presented in a user-friendly manner, and includes all the resources that a prospective customer may need when deciding on a new purchase. It showcases all of their services, such as glass replacements, window and door replacements, and installation of commercial and architectural windows and doors.

Their services have earned the company a reputation for excellence, and they are known in the industry for providing some of the most complete services with guaranteed quality. The company retains a team of licensed manufacturers that specialise in Vantage and Elevate aluminium window systems. Sharps spoke highly of the team saying, "We're fortunate to rely on such a capable team, all of whom have many years of experience in the field. For our team, no job is too complicated, and they always make sure that every project is done according to our customers' best interests.

The commitment that Vision Solutions Glass & Aluminium has shown towards its customers throughout the years is reflected in the support and appreciation that the community shows the company. This has also made Vision Solutions Glass & Aluminium the primary choice for several high profile architects and builders, who continue to partner with the company whenever high quality aluminum windows and doors need to be installed with the utmost care.

Through many platforms, such as Google Map, satisfied customers have shared their experiences with Vision Solutions Glass & Aluminium. Katherine Frey, a customer who contracted the specialist's services for an aluminium door replacement, wrote, "I called Vision Solutions Glass & Aluminium to replace a sliding glass door in my house. It was old, ugly, rattled, screeched, and had a ton of resistance while sliding. They worked around my schedule to come out within a week, and quickly and professionally took apart the heavy door. It didn't take them much longer to replace it with the new model that I had chosen, which was exactly as depicted on their website. The new door looks great and feels sturdier than the older one ever felt. Their pricing was competitive based on the multiple quotes I received, and they were pleasant and friendly to work with. I would recommend them to anyone who needs a sliding glass door replacement."

The company has also set up a Local Search business page, where new customers can view their latest updates and read reviews on past projects.

For more information on the company's services, one may contact Brad Sharp of Vision Solutions Glass & Aluminium. Interested parties may also visit the company's website, or connect with them through their social media accounts.
