

Solana Family Dental Offers La Costa Dental Services

May 29, 2019

May 29, 2019 - PRESSADVANTAGE -

Solana Family Dental, based in Solana Beach, California, has announced that they now offer dental services to residents of La Costa and neighboring areas. La Costa is part of Carlsbad and it is a luxury destination for various visitors. They assure that the La Costa dental clinic will provide the best quality of care that they also provide at Solana Beach and other service areas. There are three key elements of their service: the most dependable dental practices; state of the art equipment; and premium materials.

Elan Weinstein, a spokesperson for Solana Family Dental, says, "We are proud to announce that we have a dental clinic at La Costa, which is a part of Carlsbad. You may need to have a basic dental exam, a deep cleaning, or teeth whitening services. Perhaps it's time for your child's first dental checkup, or you're just ready to restore your teeth. Whatever your oral health goals, Solana Family Dental is your go-to La Costa dental provider."

Some of the services provided by the Solana Beach dentistry include family dentistry; Invisalign; cosmetic dentistry; cleaning and prevention; periodontal disease treatment; and restorations. Comprehensive family dentistry services are provided by hands-on dentists. Family dentistry often involves three steps: initial dental examination; professional dental cleaning; and recommendations for further dental procedure when needed.

The initial dental examination is used as the basis for every dental procedure. A thorough examination is performed to determine the health of the patient's teeth and the integrity of the neighboring tissues and structures. They utilize the most up-to-date imaging technology and x-ray to check every detail and come up with a reliable dental and oral health report. After this, the dentist will discuss the findings with the patient and suggest the most appropriate course of action.

Complete dental cleaning is often done because dental hygiene is indispensable if the patient wants good oral health. The general and family expert dental hygienists from Solana Family Dental will perform a thorough periodontal screening, pocket measuring, hand scaling, and tooth polish to get rid of all plaque and tartar deposits. It is recommended that professional cleaning should be done twice a year to keep the gums and teeth healthy.

With regards to cosmetic dentistry, Solana Family Dental offers a wide range of services, ranging from the simple to the sophisticated. These include porcelain veneers, tooth whitening, implants, crowns, and inlays/onlays.

Porcelain veneers are thin but durable porcelain facings that are bonded to the front of the teeth. They usually require less removal of tooth structure compared to full crowns. They can last of many years without requiring replacement.

Tooth whitening by bleaching is for patients who have stained or discolored teeth. This is a non-invasive treatment that can be utilized to convert a previously unattractive smile into something that is attractive for everyone.

Meanwhile, an implant is an artificial root that is placed by a dentist into the jaw to help in holding a replacement tooth or bridge. This has the advantage of having a more natural look and comfort compared to dentures. Furthermore, they can last for a lifetime if they are appropriately taken care of. They are usually better than a fixed bridge because the neighboring teeth are left intact.

Crowns are designed to encase the whole tooth, restoring its original size and shape. They are often used for those situations when fillings cannot restore teeth to a good shape. Crowns are both aesthetic and durable. Meanwhile, inlays or onlays can be used if the damage is not bad enough to require crowns or implants but the damage is too extensive for fillings. The materials that are used range from porcelains, composite, or gold. They are a more conservative cast restoration than crowns.
