

## **General Contractors Open New Location In La Canada Flintridge, California**

*May 30, 2019*

May 30, 2019 - PRESSADVANTAGE -

La Canada Flintridge General Contractors recently opened the doors of the new premises in the La Canada Flintridge, CA area, where the community has received them with open arms. The general contractors have invited the community to visit their website, where the latter may learn more about the company's services, working hours, and even schedule an appointment. The website can be found here: <https://lacontractorsgeneralcontractor.business.site>.

Mitch McDeere, a representative of La Canada Flintridge General Contractors, said, "We are very happy to announce that we have served our very first few customers, who have decided to trust their projects to us fully, despite us being the newest contractors in the area. Our clients come in full of expectations and it is our duty not only meet those expectations but surpass them every time. From now on, the La Canada Flintridge community can rely on us to provide a cutting-edge service as they have never seen before in the area. We will work hard to exceed the expectations of our future clients, and strive to deliver a service worthy of recognition."

"My fiancé and I recently bought our first home, and the first thing on our to-do list was tearing down a wall to

create an open concept," said Sarah Parker, La Canada Flintridge General Contractors' first customer. "We did some research and found these new, promising contractors in the area." She continued, "Their response time was almost immediate, they gave us a decent quote, and they were able to accommodate our work within a couple of days after we contacted them. They expanded our wall, framed it, and then closed off a hallway and created a wall to make a pantry. The result was truly beautiful, and we couldn't be happier with it. We've already called them back to do another job for us."

Considering that this is their first review, the company is off to a great start in their new location. Furthermore, the company noted that within the first few days of their official opening, a couple of residents visited their new offices to request a free estimate for projects they had in mind. A free estimate is only one of the services that La Canada Flintridge General Contractors advertises through their website, in addition to contract negotiations, budget and schedule, laws and regulations, management, and remodeling. Customers may use the following link to check whether their properties are within the company's coverage area.

La Canada Flintridge General Contractors offers one of the most complete selections of services in the area, as they are capable of handling a wide variety of projects. These include everything from small repairs in malfunctioning home appliances to full-scale indoor and outdoor renovations. The company states that their mission is to, "Take care of every project that has been postponed by the property owners."

The company also regularly sees clients who request their repair services. They affirmed that, no matter how small a repair may appear to be, their specialists will take care of it. A customer who called upon the company to repair their air conditioning unit said, "They were very knowledgeable in the matter, and were quick to identify the problem. Once they had identified it, they didn't proceed with the repair until they thoroughly explained the entire process to me, making sure that I understood what needed to be done and why, as well as the price of the repairs. Once I assured them that they could proceed, they finished the job the very same day. I recommend them totally, as I have already contacted them again for more repair jobs around my home."

The La Canada Flintridge General Contractors' services are available Monday through Saturday, and customers may visit their website through the following link to make an appointment, as well as request a free estimate for any project: <https://sites.google.com/site/lacanadaflintridgecontractors/>. Those looking for more information regarding the company's services may contact Mitch McDeere, who will gladly provide any further assistance required.
