

Laguna Vista Dental In Elk Grove, CA Offers Invisalign® For Teens

May 28, 2019

May 28, 2019 - PRESSADVANTAGE -

Elk Grove, California - Laguna Vista Dental is pleased to announce their cosmetic service, Invisalign® for Teens. As the premier dental office in the area offering complete dental solutions, Laguna Vista Dental helps patients improve the appearance and function of their smiles.

In recent years, clear aligners weren't designed to be used for teens. They were primarily used on adults who needed minor alignment issues corrected. But now, Invisalign® for Teens has allowed patients to avoid getting traditional braces, and use clear aligners instead. The treatment time is about the same but is dependant on the patient's unique situation. Most can expect to wear Invisalign for at least a year.

There are many terrific advantages for teens when they choose Invisalign treatments over conventional metal dentures. One of the most prominent being that they are virtually undetectable. This allows the teen to have dental work done, without anyone knowing. Gone are the days of being teased for having braces. With Invisalign® for Teens, no one will even know.

Owner and lead Elk Grove dentist, Krystle Fenton has said Invisalign doesn't disrupt regular routines and are

easy to use, "The aligner trays are comfortable, removable, smooth and nearly invisible. It gives you the ability to go about your daily tasks as you regularly would. We recommend wearing them as much as possible. However, you can remove them to eat, brush, or floss your teeth."

Clear aligners, like Invisalign®, should be worn for much of the day. They are removable so patients can take it out to eat, brush and floss. Unlike metal braces, the advantage of quickly caring for their natural teeth means the patient can keep their teeth in optimal condition. Patients will have to visit the dental office to have new aligners made periodically to continue shifting teeth into position.

For those parents that have been considering orthodontic treatment for their child, or it has been recommended that they should address alignment issues, Invisalign® for Teens is an excellent choice. It is more comfortable, invisible, and doesn't interfere with daily activities.

Located at 7915 Laguna Blvd #150, Elk Grove, CA 95758, Laguna Vista Dental features all the cosmetic dentistry options their patients need to correct any imperfections in their smile. One of their specialties is helping to improve smiles with the latest innovations in dentistry, including Invisalign. With the addition of Invisalign for Teens, they are able to give teens the smiles they can be confident with the rest of their lives.
