

Exclusivelyhybrid.com Announces New Affordable Option for Toyota Hybrid Braking Services.

July 17, 2015

July 17, 2015 - PRESSADVANTAGE -

Exclusivelyhybrid.com has just announced its new affordable Toyota Hybrid brake service for owners who need to have their Hybrid brakes repaired but can't afford to pay top dollar for brand new parts. The company is the leading expert in South Florida for the replacement and repair of Hybrid Batteries and also provides additional hybrid car services designed to help the owner reduce the overall costs of owning and maintaining the vehicle.

The Toyota Hybrid braking system is a unique piece of work that requires a specific skill set and knowledge base in order to repair it properly. The technicians at Exclusively Hybrid have been well trained in servicing Hybrid vehicles and have a deep understanding of exactly how the Toyota Hybrid braking system works.

The issue with the Toyota Hybrid braking system revolves around the brake accumulator valves which are sealed. When these seals start to leak (can't hold pressure), the brake system of your car isn't operating properly. As a result, all the brake warning lights will come on to let you know that there is a problem with your braking system," says Alex Valler Founder and CEO of Exclusivelyhybrid.com.

This challenge with the braking system in the Toyota Hybrid has caused Toyota to issue a recall or an extended warranty for this problem. Unfortunately not all vehicles are covered which leaves many owner?s facing the repair costs of \$2200 to \$2800 or more when having to buy and install brand new Toyota parts.

This is exactly where Alex and his company come into play. They have worked out relationships with a few key reputable suppliers that are willing to sell Exclusively Hybrid pre-owned parts with up to a six month warranty. This helps Toyota Hybrid owners in two ways: making the repairs of the braking system now much more affordable, and protecting the consumer with the 6 month warranty.

These are the types of services that are provided by Exclusively Hybrid, and are all designed to help the Hybrid owner. Other services include the repair or replacement of the hybrid car batteries which include models like Honda, Lexus and Toyota. With the surge in Hybrid ownership it?s easy to see why the services of Exclusively Hybrid are in such high demand. So much so that recently the company launched its new mobile hybrid battery division designed to help those who are within 150 miles of the companies Lake Park, FL workshop get the help they need with their Hybrid Battery issues if they can?t get the car to the shop.

If you are a South Florida resident and you need help with your Toyota Hybrid braking system at an affordable rate, exclusively Hybrid seems to be an excellent choice to service your needs. If you own other types of Honda or Lexus Hybrids and you have battery issues, Exclusivelyhybrid.com can help you as well.

Please feel free to use the contact information below to reach a representative at Exclusively Hybrid of South Florida and let them know how they can be of help.
