Fort Worth Bathtub And Tile Refinishing Service Announces New Tub Resurfacing Website

June 10, 2019

June 10, 2019 -

Tub Refinishing Pros, a bathtub and tile refinishing service in Fort Worth, Texas, has announced that they have recently launched their new website. With the new website, they expect visitors to better understand the kind of service that they can provide. For instance, their bathtub refinishing services will allow people to have a bathtub that is like new, without having to shell out a few thousand dollars that would be required to purchase a brand new tub and have it installed. More information about this can be found at https://bathtubrefinishingfortworth.business.site/.

A spokesperson for Tub Refinishing Pros says, ?We?re very happy to have launched our new website. Now, people will better understand the kinds of services that we can offer for their bathtubs. Rather than rip out and replace your old bathtub, consider reglazing and resurfacing your tub, transforming a dirty, dingy, dinged up tub into one that looks better than brand new ? and for a fraction of the cost. We have the tools, the experience, and the know-how to tackle any tub refinishing project, helping you to enjoy your bathtub once again without having to throw it out with the bathwater.?

Tub Refinishing Pros offers resurfacing and reglazing services for bathtubs. Actually, this can be performed

for any tub, sink, shower or countertop in the bathroom. They can offer a free estimate for any bathtub resurfacing project for homes in the Fort Worth area for just about any type of bathtub surface. Those who want to visit their offices can check out their Google Maps page at https://www.google.com/maps?cid=14460877927448776837.

Another service that they can offer is fiberglass and porcelain tub repair. Fiberglass showers and bathtubs have the tendency to crack or chip unexpectedly because of normal wear and tear, dropped objects, and lack of support. The result is a ?moldy? bathtub or shower, which can be remedied by the professionals at Tub Refinishing Pros.

Furthermore, the professionals at Tub Refinishing Pros are experts when it comes to refinishing or reglazing ceramic tiles. This is much less expensive than replacing old bathroom ceramic tiles. Reglazing can help in repairing any damages made to the surface of the tiles while restoring the shine and beauty of the ceramic tiles.

Meanwhile, the sinks in the bathroom are frequently used and therefore, usually suffer from much wear and tear. But rather than buying new ones, it is possible to have the bathroom sinks refinished or resurfaced, which can be efficiently done by the professionals from Tub Refinishing Pros.

And finally, the experts from Tub Refinishing Pros are capable of providing bathroom spot repair and refinishing services that are designed to upgrade existing bathroom fixtures. According to their experience, they have observed that homeowners? countertops, sinks, bathtubs, showers, vanities, and other fixtures are usually in fairly good condition. It is just that there may be some nicks or scratches, but nothing serious enough to require replacement of the fixture. These can be remedied by the spot repair and refinishing services that they provide.

Meanwhile, the proof that Tub Refinishing Pros can really provide quality services come from customer reviews. For instance, Granville A. gave them five stars and said, ?Nothing but good things to say about this bathtub refinishing company. We moved into our new home a few months ago, and the tub started to peel. Just our luck! So we looked around and called the tub refinishing pros. They charged a little extra to scrape and remove the old glazing, before applying their new coating, but it was well worth it. Our tub looks and feels brands new, and it didn't cost an arm and a leg to do! Two thumbs up.?

Tub Refinishing Pros is a bonded, licenses and certified bathroom refinishing company located in Fort Worth, Texas. They are capable of restoring and recoating just about any material such as cultured marble, ceramic, epoxy, enamel, acrylic, fiberglass, plastic, porcelain, cast iron, clawfoot, and metal bathtubs.
