

Roofing Company In Corpus Christi, TX Launches New Website

May 30, 2019

May 30, 2019 - PRESSADVANTAGE -

Galvan Builders, a business based in Corpus Christi, Texas, has announced that they have launched a new website. The company has 36 years of experience in providing roof repair and replacement in Corpus Christi, and they are capable of serving both residential and commercial buildings. The company is made up of a team of expert roofing contractors who specialize in roof replacement.

David Galvan, co-owner of Galvan Builders, says, "We are very happy to announce that we have a brand new website, which we expect to better inform people about the roofing services that we can provide. We would like to point out that for every job we do, we only make use of high-quality materials with skills to match so that the roofing solutions provided are long-lasting and of high quality. No client wants to be in a situation where they have to repair a roof problem at every turn of the year, and so we tailor our solutions to last the longest possible time."

As a roofing Corpus Christi company, Galvan Builders offers a wide range of services. These include residential roofing, commercial roofing, metal roofing, roof repair, gutters repair, tile roofing, siding installation, door installation, and windows installation.

One common service that they provide is residential roofing. It is important to note that residential roofs have different requirements when it comes to types and construction materials. In Corpus Christi, the roofs of homes provide character. Roofs are not only functional, i.e. offer shelter and protection from the elements, but also offer a way for homes to stand out from each other. Thus, Galvan Builders pays attention to a number of factors, such as the appropriate roof design, character, and performance.

And for commercial roofing, Galvan Builders offers TPO roofing, PVC roofing, and modified bitumen roofing. TPO roofing is made of a single-ply roofing membrane that is made from both ethylene-propylene and polypropylene. As such, it is a cheap and eco-friendly commercial roofing material that is very popular among property owners.

And those who prefer a combination of performance, strength and durability may want to choose PVC roofs. In addition, PVC roofs offer various colors. And the hot welding installation of PVC roofs contributes to its resistance to fire and moisture, durability, and long life span. And finally, the modified bitumen roof is installed by putting various layers of asphalt and waterproofing materials, resulting into a resilient roof that can last for a lifetime.

Meanwhile, metal roofing is becoming more popular in Corpus Christi. This is because metal roofing has durability, versatility, and energy efficiency. Furthermore, it allows building owners to save money because of its energy efficiency and durability. Galvan Builders is capable of handling the repair, installation and replacement of metal shakes and shingles, standing seam metal roofing, corrugated sheet roofing, and slate and clay-style metal tiles.

Galvan Builders is also the company to call when there is a need for roof repair. For instance, they are capable of repairing leaking roofs. Leaking roofs need to be repaired as soon as possible because this can cause more damage to the home, such as the ceiling and other parts. In addition, the company can handle buckling and folding in the columns or trusses.

Meanwhile, an important part of the roof that also needs to be taken care of are the rain gutters. These are supposed to protect the roof from excessive rainfall and exterior damage. Because of the kind of climate in Corpus Christi, homeowners and property owners can expect a lot of water run-off from the roof. Thus, it is vital to prepare for this by having an efficient gutter installation.

Galvan Builders uses only high quality materials and when combined with the skills and experience of their team of expert roofing contractors, this results into roofing solutions that last for a long time. Those who require more information regarding roofing services, such as metal roofing in Corpus Christi TX, can visit their company website, call them on the phone, or contact them via email.
