

Dynamic Heating and Cooling Shares HVAC Maintenance Tips For Pet Owners

June 07, 2019

June 07, 2019 -

Dynamic Heating and Cooling, based in Brandy Station, Virginia, recently published a post with tips for pet owners who have HVAC systems. "We want all members of the household, including pets, to enjoy the best of the weather. Although many pets have shed their winter coats, they still need a bit of extra grooming to remove dirt, dead hair, and any particles they pick up outside. These can get into the filter and eventually form the source of some allergic reactions," stated Josh Bersee of Dynamic Heating and Cooling.

The company is happy to provide information on how to improve indoor air quality for families and their pets. Those with pets, or considering getting a pet, may read the full article here: <https://www.dynamiccooling.com/hvac-maintenance-tips-for-pet-owners/>. Dynamic Heating and Cooling provides a full range of services, including installation, repairs, the provision of accessories like air purifiers, and maintenance. They serve both residential and commercial owners for all makes and models of HVAC systems.

Pet owners may not realize that an air purifier will significantly reduce the amount of pet hair which gets into their HVAC filters, in addition to helping any family member or visitor who is prone to allergies. Bersee said, "We offer a free in-home consultation with one of our HVAC specialists for anyone looking to upgrade their HVAC system. Over one-third of the energy in the US is used to heat and cool buildings. Newer technologies with filtration systems and smart thermostats, which are more efficient, just make sense to consider as they will have the biggest impact on energy costs."

Dynamic Heating and Cooling were also recently featured on the News Max website for their blog post on how to lower air-conditioning costs. A key tip mentioned is to keep the indoor temperature steady and stable through the summer months. Those who are interested in learning more can check out all the helpful blog posts the company has published on their website at <https://www.dynamiccooling.com>.

The company always recommends investing in professional maintenance for every HVAC system to ensure that everything is working as it should. Regular, professional maintenance and cleaning can prolong the life of the system in question. You can find out more about their further recommendations via their google my business page at <https://posts.gle/wSxf2>

Dynamic Heating and Cooling boasts a 5-star rating on Google, with at least four reviews in the last month alone. Barry C. said that it was, "My first time using Dynamic, and I would absolutely recommend them to anyone. They earned a loyal customer. I had a new AC installed, and Josh explained everything they were doing every step of the way. Always on time, and outstanding work and attention to detail?making sure everything was done to the highest standard."

Another reviewer who wanted their system serviced said, "This was my first time having service done by Dynamic and I am highly satisfied. The technicians were professional and courteous. I appreciated that, prior to repairing the valve, one of the technicians, Josh B., explained thoroughly and visually showed the cause of the problem to ensure I knew why the air conditioning machine was not functioning properly." They concluded, "Overall, I would definitely refer them to anyone who experiences problems with their heating and cooling needs."

The company invites all their residential and commercial customers to leave their feedback on their preferred social media platform, whether on Google, Yelp, or their Facebook page at <https://www.facebook.com/DynamicVirginia>. "We love to hear what our customers appreciate. We always do our best to show up on time, explain everything clearly and make sure every customer is satisfied with the expert care we provide," stated Bersee.

With summer on the way, customers will be pleased to learn that Dynamic Heating and Cooling's AC tune up includes an inspection of the coolant levels and pressure, checking and adjusting the thermostat, inspecting

the wiring, and many more. When the tune up is completed, the company is happy to advise the customer with regards to further maintenance or repair requirements.

Bersee continued, "Before going into the hottest part of the summer, we want everyone to be prepared so they can enjoy the fine weather. We are grateful for the trust they place in our hands and will deal with any issues as swiftly as we can." Given that critical heating and air conditioning problems can happen at any time, Dynamic Heating and Cooling are available 24/7 to deal with any emergency throughout the Northern Virginia area. A full list of the communities they serve can be found on their website.

Those who wish to book a free installation inspection, require more information about the services provided by Dynamic Heating and Cooling, or would like to make any other inquiries may find contact information on the company's website. They may also contact Josh Bersee of Dynamic Heating And Cooling to learn more.
