FTL Increases Expansion In California

June 25, 2019

June 25, 2019 -
Family Title Loans, a California based consumer finance company, has announced that they are continuing their expansion across the state in an effort to assist more families with their financial needs. The company recently announced an expansion in a press release on their Press Advantage news page. Since that time, they state that they have expanded even more in the state.

A representative for Family Title Loans says, ?California remains to be one of the most expensive states in the nation with regards to living expenses. Consumers have been forced to sell their homes and move out of the state in extreme cases just to make ends meet. Given the rising cost of living, the current inflation rates and the fact that many consumers simply do not have high enough paying jobs, living in California is stressful to say the least.?

The company states that they offer customized solutions for those who are facing hard financial times. They state that they have chosen to continue their expansion in an effort to reach more California residents with their financial solutions to help them through financial emergencies.

Studies show that consumers who live paycheck to paycheck simply do not have the means of affording any sort of financial emergency. Financial emergencies can include minor car repairs such as new tires or medical bills. Family Title Loans states that there are a number of things that can cause a family to fall on financial hardships.

?Missing just one day of work due to sickness could seriously cause a financial difficulty for a family,? says the representative for the company. ?Some people can?t afford to miss an hour of work because they truly need every single cent that their job provides. When something unexpected comes up, like repairing a kitchen appliance, buying a new car tire or taking a child to the doctor, these families could be financially devastated.?

The company offers a number of locations throughout California to make it easier for families to get the financial assistance that they need. The company representative states that they have expanded these

offices throughout the state and adds that they will continue to add new offices as the need for them arises.

A recent study showed that the median price of a home in California to purchase or to rent is about two times higher than most other states in the nation. The median price of a home in the state at the end of 2018 was more than half a million dollars. The average cost of renting a home is more than $3,000. This is nearly three times as high as renting a home in many southern states, where the median rent ranges from $750 to $1,000 per month for a family of 5. Home sales in these southern states are hundreds of thousands of dollars below those in California.

This, coupled with the high cost of food, gasoline, medical care, clothing, and other necessities, makes California one of the most expensive states in the nation to live, right behind New York City, where the cost of living is nearly the same. The spokesperson for FTL says that families in California are in serious need of financial assistance, particularly those who are facing unexpected expenses.

?We can offer these solutions to customers and this includes customers who have less than stellar credit. We have a wide range of options regarding funding and payments to customize the solution for each individual family,? says the company representative.

Those who are interested in learning more about the company and the financial solutions that they can offer to customers living in California can visit them on their official website. The website includes a convenient online application form that can help customers to get the financial assistance process started. Those who prefer to work directly with a representative will find contact information on the website to reach out to the company via phone or email, as well as driving directions to all of their offices in California.
