

Hylan Dental Care Of Aurora Discusses Five Ways To Floss Effectively With Braces

June 17, 2019

June 17, 2019 -

Hylan Dental Care of Aurora, Ohio is pleased to announce the release of their latest article that describes safe ways for owners of braces to floss. Dr. Daniel Glick, DDS of Hylan Dental Care said, "We love helping all our patients get the healthy, bright smile they deserve. Although braces make it a little harder to keep teeth clean, we want everyone to know more about the several methods available so they can choose the one which works best for them. This will reduce the risk of them developing oral problems. We offer a free consultation for anyone looking into braces, including Invisalign and Fast braces."

Part of learning how to floss with braces safely is understanding what other products are safe to be used at the same time, and which are not. One thing people may not realize, for instance, is that they should avoid using whitening toothpaste when they have braces. As the whitening product cannot get under the brackets, these areas may be a different shade to the rest of the individual teeth once the braces are removed.

Owners of braces are also advised to consider the use of electric toothbrushes. Many people think they can't use an electric toothbrush when they have braces; however, wearers can get better results with less effort when they use an electric toothbrush. Conveniently, patients can ask Hylan Dental Care of Aurora for any

available coupons or vouchers to help reduce the cost of purchasing their own electric toothbrush.

Those who wish to avoid gum disease may not be aware that flossing at least once a day to get to the troublesome spots is also a key factor to maintain good oral hygiene. Most adults have some form of gum disease and don't know it. Although over 80% of American adults believe oral care is important, over 42% do not see a dentist as often as they would like. The practice invites patients, whether they have braces or not, to schedule an appointment for themselves at the clinic so that they can make sure their oral health is in top condition.

The Aurora dentist offers a full range of services, including emergency dental care and all types of routine care, to their patients. They can help every patient, from the very youngest to the oldest, with essential services like teeth cleaning and they are always happy to offer advice regarding any problem areas. The clinic's staff even provide coaching so that patients can continue to maintain their healthy smiles at home.

Holly M., a grateful mother who took their children to the clinic, said, "Ladies and gentlemen, I've never been a fan of going to the dentist. Never. And last year, I had to go and take not one child but three—two of whom were recently adopted from Africa and had no previous dental care at all. Well, all my children absolutely love going to the dentist now because these guys were so great with them." She continued, "Today, my son had to get a cavity filled. He was nervous, but the dentist walked him through everything before he did it and it all went great. My son still loves this dentist. And they did an excellent job on my teeth as well. Also, I think it is important to note they are not pushy at all and are very upfront about pricing and what you really need and how much time you have before it needs to be done. I would refer anyone to Hylan!"

Dr. Glick said, "We are proud to serve Aurora and the surrounding areas, offering affordable dental options. We can work with most insurance companies to get the best treatment plans. Our patients can utilize the features on our website to call any of our practices directly or schedule an appointment online." Hylan Dental Care has offices in Aurora, Cleveland, Brecksville, Fairview Park, and Cedar Center.

Michelle L. wrote a 5-Star review, which said that the practice has, "Very friendly and caring staff; made me feel comfortable with the decision I needed to make. Also answered my questions. Thank you! I will definitely recommend them to friends and family."
