

## **Towing Service Launches in Miami FL**

*June 18, 2019*

June 18, 2019 - PRESSADVANTAGE -

Sands Towing, a full-service towing service in Miami FL, has announced their official business launch. The company opened its doors on May 20, 2019, in Miami and plans to offer a full range of towing and roadside assistance services to their customers.

Earl McCartney, a representative for the towing company says, "We are pleased to announce the official launch of our business. We hope to be able to provide our customers with the reliable and affordable towing services that they need for any number of situations."

McCartney says that what makes the towing company special is their commitment to affordability, which includes a straightforward approach to pricing. He states that they do not add on any hidden fees or charges and that customers can rest assured that the price that they see on their quote is the price that they will pay. He adds that they fully evaluate each and every job before it is done to ensure that customers receive the most competitive rates in the region.

"We know that hidden fees are no fun," McCartney says. "That's why we don't add them. We want our customers to know that whatever price we quote them is the price that they will pay. And, we will send out a truck as soon as possible to assist, which typically means just minutes from when our customers place their

call.?

More on the company's pricing policy can be seen on their website, which can be accessed by visiting <http://gmbp.in/u/5d03cac03502b>. McCartney says that in correlation with the new business, the company has also launched a new website which provides detailed information for customers about all of the services that they are now providing in the Miami area, as well as pricing information, service areas and any specials that they are currently offering.

"We like to go above and beyond," says McCartney. "Sometimes this means offering our customers a bit of a special or lower pricing on certain services. Those specials are updated and change regularly and can always be accessed via our new website."

McCartney says that customers can use the website to get information about all of their offered services, as well as a list of zip codes and service areas. Service areas in and around Miami currently include Miami FL, Key Biscayne FL, Hialeah FL, Opa Locka FL, North Miami Beach FL, Hallandale FL, Hollywood FL, Pembroke Pines FL, Dania FL, Fort Lauderdale FL, and Homestead FL.

Those who are interested in learning more about the company's experience, their commitment to quality or their 30 minute response time can visit them on their website. The website also offers reviews from customers that they have assisted since their official opening.

A phone number is provided on the website for those who require emergency services. McCartney says that the company offers quick dispatching for emergency roadside assistance after hours, and on weekends and holidays. He adds that any customer who is in need of emergency services can rely on the company to always answer their phone and dispatch help immediately, often reaching the customer within minutes of their placed call.

Those who have questions or who would like more information in general about the company can visit them online at <http://gmbp.in/u/5d03cb7d1ed3d> for a complete list of their services, service areas, service hours and a map to their brick and mortar location.

McCartney states that the website also offers contact information for those who wish to reach out to the company via phone or email during their normal operating hours, as well as an online contact form where customers can schedule a service or ask questions. He adds that the company looks forward to providing the Miami community with quality, dependable and affordable lockout, towing, and roadside assistance services and urges those who have questions to contact the company to learn more. McCartney states that the entire team at Sands is pleased to be of service to Miami customers and states that they are always available when customers need them.
