

Spiral Slicer From Handycook Now To Include Free Vegetable Peeler

July 28, 2015

July 28, 2015 - PRESSADVANTAGE -

HandyCook Tools, a kitchen utensils company, has recently announced that their popular Spiral Slicer kitchen tool will now come with a free vegetable peeler.

The tool has been touted as the "best compact zucchini pasta maker on Amazon" and has seen many rave reviews. In celebration of the tool and its popularity, HandyCook Tools has decided to add a free vegetable peeler with every order.

"We appreciate our customers so much that we wanted to give them a little something special with their orders," says a spokesman for HandyCook Tools. The company offers free gifts with orders and a customer satisfaction guarantee.

The spiral slicer is made from high grade food safe plastic and features sharp Japanese stainless steel blades, which come in two sizes, offering a variety of choices when it comes to creating vegetables for stir fry, julienne, or vegetable pasta. The tool has been used by many vegans and vegetarians, as well as those on low-carb and paleo diets.

"I wanted to eat healthy but honestly, vegetables are so boring. I mean, there's just so many ways you can eat a zucchini. This slicer is perfect. It allows me to create veggie pastas that my whole family will eat, and that's saying something because I have a toddler who rarely finds anything that she likes," says Monica, mother of four in San Francisco.

For a limited time, the company is offering the special packaging bundle, which includes the ceramic blade vegetable peeler, as well as a cleaning brush. HandyCook Tools offers a 100 percent, no questions asked money back guarantee on all of their products.

The tool offers safety finger guards and ease of use, and it has become a very popular item in the Amazon marketplace, seeing more than 30 positive customer reviews since its introduction just a few short weeks ago.

"We want everyone to see for themselves how easy it is to create attractive, fun, and healthy vegetables," says HandyCook Tools spokesman. "You just won't know what all you can make with this tool until you get one for yourself and start creating."
