# Radon Eliminator Publishes Guide On Radon Poisoning

*June 19, 2019*

June 19, 2019 -

Radon Eliminator, based in Uniontown, Ohio, has recently published a blog post that serves as a guide to radon poisoning. The article is titled ?A Simple Guide To Radon Poisoning and Its Health Effects.? The article points out that the second leading cause of lung cancer, after smoking cigarettes, is radon poisoning. Although it was initially thought that radon was beneficial to health during the early 20th century, it is now widely agreed upon by healthcare professionals that inhaling large amounts of radon gas can cause lung cancer.

Cedric Mims, a spokesperson for Radon Eliminator, says, ?We?re happy to announce that we have recently published an article that serves as a guide on radon poisoning. Radon is a radioactive gas that's released from the normal decay of the elements uranium, thorium, and radium in rocks and soil. It's a gas that is invisible, odorless and tasteless, making it virtually undetectable. Radon gas seeps up through the ground and diffuses into the air. Outdoors, radon gas exists at very low levels. However, in areas indoors with inadequate ventilation, radon levels can increase to levels that can significantly increase your chances of getting lung cancer. We are ready to provide radon testing and mitigation services. You can check us out on Facebook!?

Mims also points out that Ohio is one of the worst places in the US for radon. Studies have shown that Ohio

has extremely high radon levels. Thus, it is often advisable to perform radon mitigation in homes or businesses in Ohio. Radon gas can cause lung cancer because when it gets trapped in the lungs, it releases energy as it breaks down further. These small bursts of energy can cause damage to lung tissue and can result in lung cancer over a period of time.

Radon Eliminator offers discounted radon testing for residential homes. Their radon mitigation system can decrease radon levels by as much as 99 percent. Aside from ensuring the good health of family members, radon mitigation will also ensure the marketability of the home. The company follows recommendations from the Surgeon General and the EPA that all homes should be tested for radon below the third floor.

Radon Eliminator is also ready to partner with commercial contractors regarding the provision of radon testing and radon mitigation in commercial establishments. With their state-of-the-art rapid radon testing system, the results can be obtained as soon as possible. They also offer a three to four-hour radon mitigation system installation to provide a healthy working environment. Commercial contractors can get a free quote for a mitigation system and a discounted test for radon.

Meanwhile, the EPA has estimated that more than 70,000 school rooms have high short-term radon levels. That is why Radon Eliminator also offers radon testing and mitigation services for schools. School administrators would be able to ensure a healthy school environment in as short a time as possible with the three to four-hour Radon Mitigation System offered by Radon Eliminator.

Radon Eliminator is also ready to partner with real estate professionals to help their clients solve their radon problem. The company offers the lowest prices on radon testing services and competitive radon mitigation prices. Results are guaranteed in writing, and they will be performing a 100 percent cleanup after the installation of a radon mitigation system.

And finally, they also offer radon testing and mitigation services for apartment complexes. This is particularly important for those who have recently purchased a commercial property in Ohio. Radon testing is needed to ensure that they will not end up with a building that requires extensive work. These services are not just for apartment complexes but also condo buildings, churches, business offices, government buildings, and public buildings.

Radon Eliminator is made up of well-experienced and certified professional radon mitigation specialists. They are ready to utilize the most advanced equipment for detecting radon and then eliminating it.

People who need more information about the services Radon Eliminator offers can visit their website, or contact them by phone or by email.
