A Chamblee based dental clinic, Yi-Tsu Cheng, D.D.S. & Associates, would like to make the residents of Chamblee aware that the practice offers dental crowns as part of their services. When a large cavity begins to threaten the long term health of a tooth, it often becomes necessary to repair or restore the tooth. This can be accomplished using dental crowns, a type of prosthetic which cover or surround the damaged tooth or implant with the aim of improving the appearance or stability of a tooth. Those looking for a Dental Crown in Chamblee GA can visit Yi-Tsu Cheng to get started.

Using dental cement, crowns are usually bonded to the tooth, and can be made from a variety of different materials ranging from porcelain to gold. Dental crowns are considered inarguably beneficial to dental health as they provide a reliable way to repair whatever damage has been done to the teeth while also preventing any further damage from taking place. The most common method of crowning a tooth involves using an impression of the tooth made by a dentist to create a crown that fits. The crown is inserted using dental cement later on. Despite being a simple and easy solution to dental issues, they are also highly effective.

With over 20 years? experience serving in the Atlanta Metro area, Yi-Tsu Cheng, D.D.S. & Associates?s

The staff is great and everyone seems to enjoy being there.?

Another client left a five star review, saying, ?This is the best dental office I have ever visited. The staff is super professional, kind, and helpful. My dentist, Dr. Cheng, is a highly skilled and talented dentist. She truly cares about her patients and is willing to go the extra mile. I love her personality. She is very friendly and gentle with a great sense of humor. I couldn?t have expected a better dental experience.
