

Central Tree Service Lancaster Launches New Website

June 28, 2019

June 28, 2019 - PRESSADVANTAGE -

Central Tree Service Lancaster, a tree service provider based in Lancaster, Pennsylvania, has announced that they have recently launched a new website. With the new website they expect people to better comprehend the kinds of tree services that they are able to provide. The company provides tree removal, tree trimming, stump removal, stump grinding, tree pruning and fruit tree pruning, cabling and bracing, tree fertilization and injections, and more.

Gary Helms, a representative for Central Tree Service Lancaster, says, "Central Tree Service Lancaster is a full service tree care company servicing Lancaster and surrounding areas. We provide both commercial as well as residential services. Call now if you are needing tree trimming, tree removal, stump removal, pruning, branch clearing, or have any general concerns regarding tree health and growth. Call today for a free estimate."

Tree removal is an important service that needs a tree professional's insight in order to be successful. Gary Helms points out that they have the appropriate team to take care of the tree removal task whether it is for landscaping, aesthetic reasons, or emergency purposes. The team from Central Tree Service Lancaster can also be depended on for those situations when the tree to be removed is in a hard to reach location.

Meanwhile, tree trimming or pruning is a task that may seem to be easy but Gary Helms would like to warn property owners that it is not exactly a do-it-yourself task even if there are DIY tips available. First of all, it can be dangerous. Secondly, a professional arborist is the most appropriate person to do the job because there is the possibility of improper trimming or pruning and this can damage the health of the tree. Trimming and pruning is vital for a tree's health but if done incorrectly, it could harm the tree and prevent it from growing healthy.

Taking care of tree health and fertilization is also an important service that can be provided by the Lancaster tree service company. Pests and diseases can affect some trees in the yard if they are not properly taken care of or maintained for a long time. With the licensed arborists from the company, the tree health is taken care of and the presence of diseases and pests can be detected as early as possible so that the appropriate solution can be provided.

Another service offered by Central Tree Service Lancaster is cabling and bracing. This is for trees with structural failure because such trees can be quite dangerous as they can present several risk hazards. Gary Helms advises property owners to call them immediately if they suspect that a tree is suffering from structural failure.

Still another service offered by the tree service provider from Lancaster is palm tree removal and trimming. Palm trees are often used for decorative purposes. However, they need special treatment and certain methods to take care of their health. The professional arborists from the company are knowledgeable and experienced on how to take care of palm trees, trimming them or removing them when needed.

The team from Central Tree Service Lancaster have the most advanced equipment and tools at their disposal to do the jobs properly, safely, and quickly. Even if the tree is located on a difficult terrain, they are specially trained and have the necessary equipment to remove the tree, trim the tree, or whatever is required.

It is also advisable to get the services of tree experts to avoid getting in trouble with the local authorities. In Lancaster, Pennsylvania, a permit is required for removing a tree.

Central Tree Service Lancaster is a licensed, bonded and trusted tree care services provider serving Lancaster and neighboring areas such as Lititz, Elizabethtown, Ephrata, York, and Lebanon. It is a locally owned family business with more than 10 years of experience. Those who require more information can visit their website at <https://tree-service-lancaster.com>, call them on the phone, or contact them via email. They are open from Monday to Sunday, from 8:00 am to 8:00 pm.
