Energio Promotes Their Portable Battery Chargers On Their Newly Launched Facebook Page

July 28, 2015

July 28, 2015 -

Energio, a manufacter of portable battery chargers, has recently announced the launch of their official Facebook page. This page will act as an outlet to connect with their customers, as Patrick Loh, founder of Energio has elaborated, "With the launch of our new corporate Facebook page, we will be able to update customers about Energio's products and promotions in a convenient way." The company has already seen several of their customers subscribing to the page.

Energio's premiere product is their Energio SLIM portable external battery charger. The Energio SLIM external battery pack is seen as one of the slimmest portable chargers available according to feedback reviews left on their Amazon store. Their new Facebook page pays homage to their best selling product by touting the power bank as their cover image. With a capacity of 3850 mAh, it holds a generous amount of charge for such a compact charger, and it can to fully replenish the battery of an average sized smartphone. "It gives my S6 phone a full charge faster than a wall charger does," explained one customer. "I'm really pleased with it."

The design of a compact portable charger with built in cable has proven to be particularly appealing to

Energio's customers. One customer detailed, "Its small and thin size makes it easy for me to carry it everywhere I go without taking up too much space in my bag, and the built in charging cable is very handy without the need to bring along another cable." With an additional free iPhone lightning adapter included, SLIM has ensured compatibility for virtually any smartphone currently in the market.

The company has historically connected with their customers via their Amazon store. "I have to say that the customer service skills displayed by this company are off the charts!" said a customer. Dawn, said, appreciating the company's communication, "I got a faulty charger by mistake and they quickly messaged me back to provide a replacement one." The setup of their Facebook page has enabled a direct line of contact between the users and Energio, enabling quick resolution to any issues.
